

CONTENTS

	Page
Part VII Microemulsions and Reactions in Microemulsions	
Solubilization in Microemulsions	1137
Low Interfacial Tension in Microemulsion Systems	1159
Phase Separation in Microemulsions	1167
Theory of Shape Transitions in Microemulsions	1177
Pressure Induced Phase Transition of an Oil External microemulsion	1193
Microemulsion Phase in Equilibrium with Birefringent Surfactant-Rich Phases	1203
Viscosity of Microemulsion Versus Salinity	1213
The Pseudophase model for Microemulsion: Windor's Diagrams in Pseudophase Space for the Betaine, Pentanol, Decane, and Water System	1223
Effect of Anionic Surfactants on the Partitioning of Nonionic Surfactants Between Oil/ Microemulsion/ Water Phases	1231
Critical Behavior in a Microemulsion System: I – Experimental Evidence for Field Like Variable	1247
Critical Behavior in Microemulsion System: II – Experimental Evidence for a Continuous Variation of Critical Exponents	1263
A Critical Study of Models of Solutions via Vapour pressure measurements of Microemulsions	1277
Neutron Small Angle Scattering Studies of Microemulsions Showing Critical Behaviour: Structure of the Winsor III phase	1287
Analysis of SANS Data from Dense microemulsions	1303
Analysis of Critical Scattering Data From AOT / D ₂ O / n-Decane microemulsions	1315
Investigation of the Microemulsion Phase Structure of Polyphasic Systems by TimeDomain Spectroscopy and Light Scattering	1331
Evidences of Structural Changes in Reverse Microemulsion Systems Formulated with Nonionic Surfactants	1345
NMR as a complementary Technique to the Small Angle Neutron Scattering: Study of Nonionic Aqueous Microemulsions of Perfluorocarbons	1357
Luminescent – Probe Study of Water-in-Oil Microeulsions	1365
Diffusion Coefficients in Microemulsions	1373
Ellipsometry in Microemulsions	1383

Waterless Microemulsion – 3: Formamide a Substitute of Water	1397
Investigations into the Mechanism of Formation of Water-in-Xylene Microemulsions Using Interfacial Tension Measurements	1409
Structure of a Fluorinated nonionic O/W Microemulsion	1421
Fluorocarbon Microemulsions: An Attempt to Rationalize Their Formation	1431
Formulation and Properties of an Alcohol-free, pharmaceutical Microemulsion System	1441
Physico-Chemical Study of Water/Methylene Chloride Microemulsions: Effect of Alcohol Cosurfactant	1457
Modification of Polyacrylamide Microlatices by Using a Seeding Procedure	1473
Part VIII. General Papers	
Statistical Mechanics of Adsorption and Wetting Transitions	1485
Theories of Surface Tension	1525
A New Method for Measuring Film and Line Tensions	1537
Hydrostatics of Spherical Thin Films	1549
Interfacial Activity of Polydimethylsiloxane	1557
Foam Chromatography: Recent Developments	1571
Electron Microscopy in the Research of Surfactants in Solution	1581
Drag Reduction in Aqueous Solution of Hexadecyltrimethylammonium Salicylate	1589
Concerning the Nature of Heat Sensitivity of Natural Latex	1599
Diffusion Effects in the Flocculation of Surfactant-Stabilized Latexes	1607
The Rheological Properties of Water-in-Crude-Oil Emulsions	1617
Physicochemical Characterization of Two Phase Systems Employed in Emulsion Polymerization	1633
Influence of Crude Oil and Surfactant Concentration on the Rheology and Flowing Properties of Heavy Crude Oil-in-Water Emulsions	1653
The Effect of Polysaccharides on the Stability of Oil-in-Water Emulsions	1675
Inversion of Surfactant-Oil-Brine Emulsified Systems: Generalized Mapping and property Transitions	1689
X-Ray Diffraction Study of Suspensions of Toluene with $\text{CH}_3(\text{CH})_{2n-1}^{\text{N}^+}(\text{CH}_3)_3$ -type Montmorillonite, Where $n=1,2,6,8,10,12,14,16$ and 18	1697
Effect of Nonionic Surfactants on the Stability of Hydrophobic Sols	1705
The Possibility of using Disulfonated Cosurfactant for Enhanced Oil Recovery	1715
The Role of Silicone Surfactants in Coal Dewatering	1731
About the Contributors	1747
