

## CONTENTS

	Page
Part I Aggregation of Surfactants, and Structure, Dynamics and Characterization of Micelles	
Microstructure and Molecular Dynamics of Surfactant Solutions: An Overview of NMR Self-Diffusion and Relaxation Studies	1
Lattice Theory for the Association of Amphipolar Molecules in Planar Symmetry	25
The Equilibrium Structure of Micelles	43
Three Body Forces and the Properties of Nonionic Micellar Solutions	61
Spectroscopic Tools in the Study of Micelles and membranes	79
Dynamic Light Scattering and Applications to Micellar Systems	105
Fluorescence Quenching and the Study of Micellar Systems: Possibilities and Limitations of the Method	125
Fluorescence Quenching in Micellar Solutions by Charged and Neutral Quenchers	141
The Structure of Triton X 100 and Hexadecylpyridinium Chloride in aqueous Solutions. Fluorescence and Small-Angle X-Ray Scattering Studies in the Presence of Hg (CN) <sub>2</sub>	159
Size, Shape and Internal Structure of Triton X-100 Micelles Determined by Light and Small-Angle X-Ray Scattering Techniques	181
Systematic Investigation of Sodium Alkylsulphate Micelles Using Small Angle Neutron and Positron Annihilation Techniques	197
Small Angle Neutron Scattering Studies on Fluorocarbon-hydrocarbon Surfactant Mixtures	211
Pressure-Induced Surfactant Association: The Concept of a Critical Coagelization Pressure	223
Thermodynamic Properties of Micellar Systems	233
Micellization of Polyoxyethylene Monohexadecyl Ethers in Water	245
Calorimetric Study on the Self Association of Promethazine Hydrochloride in Aqueous Solutions of High Ionic Strength	265
Enthalpies and Heat Capacities of micellization of some Surfactants in aqueous Urea Solutions	277
Determination of Activity Coefficients of HBr in aqueous Surfactant Solutions	289
Enthalpy of Solution of Nonionic Solutes in Organized Systems	299
Studies on Thermodynamics of Micellization of Nonionic Surfactants Triton X-100 and Brij 35 in Aqueous Solution: Effect of Polyethylene Glycol 400 and Acetamide	319
Micellar Behaviour of Styrene-Ethylene Oxide Block Copolymers In Aqueous Solutions and Their Interaction with Ionic Surfactants	329

Behavior of Nonionic Surfactant, Surfynol 465, in Aqueous Media	341
Surfactant Properties of Castor Fatty Acid Derivatives	359
Interfacial and Aggregation Behavior of Functionalized Surfactants	371
Raman Special Analysis of the Conformations of the Dodecanoate and 10-Undecenoate Chains	379
Classification of Probes for Studying Mixed Surfactant System	385
Pressure Effect on Micelle Formation in Mixed Systems of Sodium Perfluorooctanoate with hydrocarbon Surfactants – Sodium Dodecyl Sulfate, Sodium Decyl Sulfate and Nonanoyl – n – Methylglucamine	397
Solution Properties of Mixed Surfactant Systems: Effect of hydrophobic Properties of Nonionic Surfactant on Mixed Micelle Formation	413
Interaction of Rodlike Micelles of Dimethyloleylamine Oxide in Aqueous Solutions	443
Characteristics of Rodlike Micelles of Alkyltrimethylammonium Halides in Aqueous Sodium Halide Solutions: Their Flexibility and Entanglement	455
Studies on Solubility, Viscosity and Conductivity of Calcium Caprate	473
Chemistry of the Oleic Acid-H <sub>2</sub> O-NaCl System vs pH at 25 °C	483
About the Contributors	497
Index	507
