

CONTENTS

	Page
Part III. Reverse Micelles and Aggregation in Apolar Media	
Biotechnological Applications of Reversed Micelles	1
Enzymes Entrapped into Reversed Micelles: Potentialities in Applied Areas	15
A Simplified Thermodynamic Model for Protein Uptake by Reverse micelles	25
Time Effect in the Supramolecular Formation of Cobalt Monooleate in Apolar Solvents	47
Specific Equilibria of Zn(II) Oleate and Stearate in Organic Solvents	63
Reversed micellization in Metal-Organophosphorus Extractant Systems of Commercial Importance	77
Part IV Micellar Catalysis and Reactions in Surfactant Solutions	
Chemistry in Micelles and Microemulsions: Analysis of Water Insoluble Compounds in Aqueous Micellar Systems and O/W Microemulsions	87
Acid-Base Properties of Liquid Dispersed Systems: Micellar Solutions Emulsions and Microemulsions	105
Polymerization in the Micellar State. Physicochemical Aspects	119
Electrochemical Studies in Surfactant Solutions	135
Surfactant Effects on the Electrochemical Reduction of an α,β –unsaturated Ketone	149
Photoprocesses in Surfactant Solutions of thionine	153
Modification of Photochemical Reactivity by incorporation of Reactants into Hydrophobic Pockets and Cavities: Conformational and Cage Effects	167
Photo-Rearrangements in a Micellar Environment	185
Acid Catalyzed Hydrolysis of Hydrophobic Ketals in Aqueous Cationic Micelles: Partial Failure Of the Pseudophase Ion Exchange Model	197
Discussion of Different Kinetic models for Explaining Experimental Results in Cationic Micelles	211
Effect of Cationic and Anionic Surfactants on the Nucleophilic Addition of Cyanide Ion to an N-Alkyl Substituted Triphenylmethyl Carbonium Ion	229
Evidence for Carbinolamine Intermediate in Schiff Base Hydrolysis	241
Incorporation of Triphenylmethane Dye Cations into Surfactant micelles	253
Sensitive microspectrophotometric Determination of some Lanthanides with Bromopyrogallol Red in Presence of Micelle Forming Cationic Surfactants	261
Part V Monolayers and Adsorption of Surfactants	
Recent Developments in the Field of Monolayers	277

Monolayer Behavior of Surface active Metal Extractants	297
Discussion of Compression Isotherms of Some Carotenoid Monolayers on the Basis of HMO Calculations	311
Interactions of Ionic Surfactants with stationary Phases in Micellar Liquid Chromatography: Adsorption and Efficiency	325
Investigations into the Structure of the Adsorbed Layer of Dodecylsulfate at the Alumina-Water Interface	339
Effect of Solution Chemistry of Sodium Oleate on Adsorption and Surface Wettability of Apatite and Dolomite	351
Adsorption Enthalpy of Surfactants at a Mineral-Water Interface	359
Electrochemical Aspects of Sodium Dodecyl Sulfate Adsorption at the ZnO/Electrolyte Interface	371
Adsorption Behaviour of Surface Active Agents and Electrokinetic Phenomena	381
Adsorption of Surfactants on Modified Controlled porosity Glasses (CPG's)	397
Galorimetric Study of the Adsorption of Nonionic Surfactants onto Silica gel	405
Uptake of Sodium Lauryl sulphate by Acrylonitrile and Methyl Methacrylate Based Porous Polymeric Adsorbents	413
Adsorption of Phenoxyacetic Acid and Trans-Cinnamic Acid on Hydroxyapatite	425
Some Recent Studies on the Effect of Polymer Polarity on Surfactant Adsorption at latex/Water Interface	435
Adsorption Kinetics at the Liquid / Liquid Interface	443
Self Consistent Mean Field Calculations on the Adsorption of Block Copolymers at the Liquid /Liquid Interface	455
Oil-Water Interfaces: Surface Tension, Rigidity and Structure	463
Experimental Investigations on the Structure of Copolymer at the Liquid/Liquid Interface	471
Adsorption of Nonionic Surfactants at Water-Silicone Oil Interface	479
Adsorption of Hydroxyoximes at the Organic/Aqueous Interface and the Interfacial Mechanism of Copper Extraction	485
