About the Authors	xiv
Acknowledgements	xvi
Chapter 1 Glycerol: Properties and Production	1
1.1 Properties of Glycerol	1
1.2 Traditional Commercial Applications	6
1.3 Production of Bioglycerol and Commercial Trends	10
1.4 Glycerol as Solvent in Organic Reactions	20
1.5 Bioglycerol Purification	23
References	25
Chapter 2 Reforming	29
2.1 Glycerol as a Platform for Green Fuels	29
2.2 Production of Hydrogen <i>via</i> Aqueous Phase Reforming	32
2.3 Production of Hydrocarbon Fuels <i>via</i> Aqueous Phase Reforming	36
2.4 Industrial Applications	40
References	42
Chapter 3 Selective Reduction	45
3.1 Reduction of Glycerol	45
3.2 Hydrogenolysis to Propylene Glycol	45
3.3 Dehydroxylation to 1,3-Propanediol	50

RSC Green Chemistry No. 8

The Future of Glycerol: 2nd Edition

By Mario Pagliaro and Michele Rossi

Published by the Royal Society of Chemistry, www.rsc.org

3.4	Biological reduction to PDO	51
3.5	Commercial Applications	53
	References	56
Chapter 4	Chlorination	59
4.1	Chlorination of Glycerol	59
4.2	Production of Epichlorohydrin	62
4.3	Industrial Applications	65
	References	68
Chapter 5	Dehydration	70
5.1	Dehydration of Glycerol	70
5.2	Dehydration to Acrolein	71
5.3	Propane from Acrolein	77
5.4	Oxydehydration to Acrylic Acid	80
5.5	Dehydration to 3-Hydroxypropionaldehyde	81
5.6	Industrial Applications	82
	References	84
Chapter 6	Etherification	87
6.1	Etherification of Glycerol	87
6.2	Butylation of glycerol <i>tert</i> -butyl ethers	87
6.3	Direct Telomerization and Etherification over CaO	93
6.4	Polymerization to Polyglycerol	95
6.5	Glycosylation to Glucosyl Glycerol	97
6.6	Industrial Applications	97
	References	99
Chapter 7	Esterification	102
7.1	Esterification of Glycerol	102
7.2	Esterification with Carboxylic Acids and Glycerolysis	102
7.3	Carboxylation to Glycerol Carbonate	107
7.4	Nitration	109
7.5	Industrial Applications	110
	References	112
Chapter 8	Selective Oxidation	115
8.1	Selective Oxidation of Glycerol	115
8.2	Thermodynamic and Kinetic Aspects of Aerobic C-OH Oxidation	118
8.3	Platinum-Group Metal Catalysis	119

<i>Contents</i>	xiii
8.4 Gold and Organocatalysis	122
8.5 Oxidation Using an Iron Catalyst	124
8.6 Electrochemical Oxidation	126
8.7 Biological Oxidation	128
References	131
Chapter 9 Bioglycerol in the Construction Industry	135
9.1 Polyols as Additives for Cement	135
9.2 Glycerol as Anticracking and Waterproofing Agent	139
9.3 Raw Glycerol as Quality Enhancer and Grinding Aid	140
9.4 Bioglycerol as Anticorrosive Lubricant	142
References	147
Chapter 10 Sustainability of Bioglycerol	149
10.1 Biofuels: A Triple Bottom Line Analysis	149
10.2 Bioglycerol Economics	153
10.3 Glycerol: A Platform Chemical for the Biorefinery	160
References	163
Subject Index	166
