

CONTENTS

	Page
Chapter I An Introduction to polymer Science	1
The Structure of Polymer	1
1. The Constitution of polymers	3
2. Polymer Chain Structures	3
3. Stereochemistry of Polymer Chains	4
4. Molecular Weight	8
5. Polydispersity and Molecular Weight distribution	10
6. Glass Transition temperature	11
7. The Theory of Addition Polymerization	17
8. The Kinetics of Addition Polymerization	23
9. Copolymerization	27
10. The Kinetics of Copolymerization	27
11. The Theory of Condensation Polymerization	31
Chapter II Glyceride Oils	45
1. The Structure of Glyceride Oils	47
2. The Classifications of Glyceride Oils	48
3. The Chemistry of the Drying Process	49
4. Modified and Treated Oils	55
5. The Properties and uses of Glyceride Oils	60
Chapter III Hard Resins, Oleoresinous Media & Varnishes	63
1. Natural Resins	65
2. Hydrocarbon Resins	67
3. Coumarone & Indene Resins	68
4. Ketone Resins	70
5. Rosin	74
6. Rosin Modifications	77
7. Natural Resin Media & Varnishes	107
8. Oleoresinous Varnishes & Media	111
9. An Alternative Method of Modifying Oils with Resins	125
10. References	126
Chapter IV Alkyd Resins	129
Index	208
