

CONTENTS

	Page
Chapter 1 Introduction to Industrial Gums	3
Chapter 2 Conformational Origins of Polysaccharide Solution and Gel Properties	21
Chapter 3 Chemical Modification of Gums	53
Chapter 4 Biosynthesis of Extracellular Polysaccharides (Exopolysaccharides)	69
Chapter 5 Agar	87
Chapter 6 Algin	105
Chapter 7 Carrageenan	145
Chapter 8 Guar, Locust Bean, Tara, and Fenugreek Gums	181
Chapter 9 Aloe, Chia, Flaxseed, Okra, Psyllium seed, Quince Seed, and Tamarind Gums	227
Chapter 10 Pectin	257
Chapter 11 Hemicelluloses	295
Chapter 12 Exudate Gums	309
Chapter 13 Xanthan, Gellan, Welan, and Rhamsan	341
Chapter 14 Dextran	399
Chapter 15 Curdlan	427
Chapter 16 Pullulan	447
Chapter 17 Scleroglucan	461

Chapter 18 Methylcellulose and Its Derivatives	475
Chapter 19 Hydroxyalkyl and Ethyl Ethers of Cellulose	505
Chapter 20 Sodium Carboxymethylcellulose	537
Chapter 21 Starch-Based Gums	579
Chapter 22 Chitin	601
Chapter 23 Analysis of Gums in Foods	605
Index	619
