

CONTENTS

	Page
1. The Elastic Moduli of Structural Adhesives	1
2. Contact Angle Studies of Polymer Surfaces	19
3. A Practical Look at Adhesion Promoters and Contact Angles	33
4. Adhesion of Polyurethane Rubbers to Concrete	53
5. Microstructure and Autohesive Tack	63
6. Tack of EPDM Compounds	85
7. Adhesive Properties of Copolymers Based on dialkylmaleate	107
8. The role of External Modifiers on Viscoelastic Behaviour of Acrylic Adhesion	121
9. Adhesion and Friction of Rubber Surfaces	141
10. Stabilisation of Polychloroprene Dispersions in Aliphatic Media	153
11. Evaluation of an Ultraviolet-Curing Structural Adhesive	165
12. Dispersion and Polar Contribution to the Liquid-Liquid and Solid-Liquid interfacial Energy: Effect of Temperature	181
13. Nature of Adhesive Forces in Rubber Friction	207
14. Some Micromorphological Studies of Epoxy Resins	223
15. Transcrystallinity as a Factor in Controlling Adhesion	235
16. The Effect of Shrinkage Stress on the Water-Induced Failure of Epoxy/ Aluminium Joints	251
17.	
18. Effects of surface Treatment and Corrosion on the Peel strength of an electrodeposited Epoxy resin	269
18. Melt Adhesives and Their Applications	289
19. Adhesion of Polyethylene to Copper	297
Index	311
