

CONTENTS

	Page	
1	Standard Adhesive Test Techniques	1
	1.1 Introduction	1
	1.2 Tensile Tests	3
	1.3 Shear tests	9
	1.4 Peel Tests	14
	1.5 Other Standard Tests	16
	1.6 Fracture Mechanics Test Methods	19
	References	20
2	Theory of Adhesive Fracture	23
	2.1 Introduction	23
	2.2 The Continuum Approach to Design	24
	2.3 Adhesive Fracture Energy	33
	2.4 Stresses in Bimaterial Systems	36
	2.5 Examples of Adhesive Fracture Analysis	50
	References	55
3	Adhesive Fracture Energy Tests	57
	3.1 Introduction	57
	3.2 Blister Test	58
	3.3 Cone Tests	69
	3.4 Peel Tests	82
	3.5 Lap shear	90
	3.6 Cantilever Beam Tests	108
	References	118
4	Analytical Methods and Computer Techniques for Adhesive Bonding	121
	4.1 Introduction	121
	4.2 Analysis for Stresses	126
	4.3 Strain Energy Release Rate	135
	4.4 Stress Intensity Factors	146
	References	151
5	Chemical and Physical Aspects of Adhesive Fracture	155
	5.1 Chemistry of Adhesion and Structural Bond Strength	155
	5.2 Molecular Theory of Adhesive Fracture	163
	5.3 Time Dependency of Fracture Energy	166
	References	182
6	Specific Applications and Aspects of Adhesive Fracture Mechanics	185
	6.1 Introduction	185
	6.2 Loading mode	186
	6.3 Adhesive Thickness	198
	6.4 Dental Adhesives	213
	6.5 Explosively Welded Plates	219
	6.6 Fatigue in Adhesive Joints	227
	6.7 Current Research	229
	References	248
	Index	251
