CONTENTS

	Page
Chapter 1 Adhesion	1
1. Introduction	1
2. Definitions and classifications	3
3. Molecular forces	11
4. The surface of adherends	18
5. The adhesion of liquids to solids	29
6. The adhesion of solids to solids	52
7. Mechanical properties	64
8. Adhesion and cohesion	101
List of symbols	126
References	128
Chapter 2 Animal glue and related protein adhesives	141
1. Introduction	141
2. Manufacture of animal glue	141
3. Composition of animal glue	143
4. Chemical structure and properties of gelatin	143
5. The grading and testing of glue	150
6. The use of animal glue – general	152
7. Particular uses of animal glue	155
8. Casein glue	159
9. Blood albumin glue	163
10. Soyabean glue	164
Acknowledgements	165
References	165
Chapter 3 Vegetable Adhesives	167
1. Introduction	167
2. Dextrins	170
3. Acid-modified starch	175
4. Oxidized starch	176
5. Starch derivatives	176
6. Cellulose derivatives	178
7. Alkali conversions	179
8. Salt conversions	180
9. Enzyme conversions	180
10. Natural gums	182
11. Unmodified starch	183
12. Applications and related uses of vegetable adhesives	183
References	185
Chapter 4 Synthetic organic adhesives	186
1. Urea formaldehyde adhesives	187
2. Melamine formaldehyde adhesives	207
3. Phenol formaldehyde adhesives	209
4. Resorcinol formaldehyde adhesives	230
5. Epoxy resin adhesives	240
6. Polyisocyanate adhesives	281
7. Polyester resin adhesives	288
8. Miscellaneous thermosetting adhesives	291
Thermoplastic Resin Adhesives	293

9. Cellulose adhesives 294
10. Polyvinyl adhesives 296
11. Acrylic-resin adhesives 305
12. Polyamide resins and nylons 310
13. Miscellaneous thermoplastic adhesives 313
Two-Polymer Adhesives 318
14. Polyvinyl acetal / Phenolic resin adhesives 320
15. Nitrile rubber / phenolic resin adhesives 326
16. Neoprene rubber / phenolic resin adhesives 330
17. Epoxy / nylon adhesives 333
References 337

Chapter 5 Bituminous binders and Coatings 353
1. Introduction 353
2. Adhesion 358
3. Rheology 360
4. Breaking strength 371
5. Durability 372
6. Concluding remarks 373
References 374

Chapter 6 Rubbers 375
1. Introduction 375
2. Tack 375
3. Rubbery materials as adhesives 384
4. Sealants 395
5. The bonding of rubber to metals 396
6. Adhesion of rubber to textiles 408
References 413
Addendum 415

Chapter 17 Glass, Enamels and Ceramics 419
1. Introduction 419
2. Adhesion properties of glass 422
3. Theories of glass bonding 428
4. Wetting and bond strength 430
5. Applications 431
Enamels 434
6. Some properties of enamels 434
7. Enamelling Practice 434
8. Enamel as an adhesive 435
Ceramics 436
9. Ceramic-to-glass and ceramic-to-metal bonds 436
References 437

Chapter 8 Inorganic adhesives and cements 439
1. Introduction 439
2. Composition 439
3. Properties 441
4. Applications 476
References 478

Chapter 9 Inorganic adhesives and cements 481
1. Phosphate cements 481
2. Hydraulic cements 484
3. High temperature cements 491
4. Miscellaneous cements 494
References 495

Chapter 10 Metallic adhesives 498

1. Introduction 498
2. Welding 499
3. Soldering 504
4. Strength of soldered joints 515
5. Soldering in practice 522
References 533
Historical table 534
Subject Index 537
