

CONTENTS

	Page
Introduction	1
1. Literature	1
2. Adhesion	2
3. Surface roughness and surface treatment	8
4. Composites	12
5. Stresses in adhesive joints	16
6. Adhesives for the aerospace industry	22
7. Some notes on raw materials, applications and processing	35
8. Testing	47
9. Economy	54
References	62
Addendum: useful conversion factors	68
 Chapter 11 Surface Texture	 69
1. General	69
2. The quantitative assessment of surface texture	70
3. Surface profiles	72
4. Methods of determination	76
5. Mathematical evaluation	80
6. definitions	83
References	85
 Chapter 12 Surface Treatment of Adherends	 87
1. Metals	87
2. Polymers	94
3. Wood	98
4. Glass	99
References	104
 Chapter 13 Adhesive Bonding Processes	 107
1. Applying the adhesive to the adherend	108
2. Holding the glued parts in position and applying pressure	119
3. Applying heat in adhesive bonding	143
4. Miscellaneous techniques that concern adhesive bonding	154
References	162
 Chapter 14 Wood, Reconstituted Wood and Glued Laminated Structures	 166
1. Introduction	166
2. Wood as an adherend	166
3. Adhesives engineering	195
4. Plywood and veneer	210
Reconstituted Wood	219
5. Fiberboard	219
6. Particle Board	228
7. Glued laminated structures	245
Acknowledgements	266
References	267
 Chapter 15 Adhesive-bonded Metal Structures	 281
1. Introduction	281
2. Significance of metal bonding	282

3.	Adhesive for structural applications	282
4.	Adhesive-bonded metal structures	286
5.	Production of adhesive bonds	297
6.	Non-structural adhesive-bonded metal joints	337
	References	341
Chapter 16 Bonded Composite structures		344
1.	Introduction	344
2.	Qualities of sandwich panels	346
3.	Design philosophy with sandwich panels	347
4.	Materials for sandwich construction	350
5.	Some physical properties of panels	359
6.	Adhesives and bonding methods	360
7.	Application of sandwich construction	367
8.	Some economical viewpoints	382
	Bibliography	384
Chapter 17 Pressure-Sensitive adhesive tapes		387
1.	Construction and uses	387
2.	Electrically conductive tapes	397
3.	Peel	401
4.	Testing	406
	References	407
Chapter 18 Rubber-Textile structures		409
1.	General considerations	409
2.	Rubber with woven textiles	410
3.	Rubber with non-woven fabrics	411
4.	Tyres	413
	References	418
	Addendum	418
	References	422
Chapter 19 The Tack of Printing Inks		423
1.	Introduction	423
2.	Definition of tack	424
3.	Kinematics and dynamics of film splitting	425
4.	Results	435
	References	439
Chapter 20 Adhesion in paint technology		441
1.	Introduction	441
2.	Functions of adhesive joints and of paint films	441
3.	Composition and formation of paint film	442
4.	Concepts of adhesion and mechanical testing	445
5.	Climatological factors affecting adhesion	458
	References	470
Chapter 21 Miscellaneous applications		472
	New uses for adhesives	473
Chapter 22 Testing of adhesives		482
1.	Viscosity	482
2.	Jelly strength	484
3.	Pot-life	484
4.	Solids and filler content and adulterants	485
5.	pH measurement	486
6.	Freeze / thaw stability	486
7.	Stability	487
8.	Flash-point	487

9. Some tests specifically applicable to one type of adhesive	487
References	489
Chapter 23 Mechanical Testing of bonded Joints	490
1. The significance of tests and their results	490
2. Tests of joint strength	495
3. Environment tests	541
References	543
Appendix. Adhesives Charts	545
Subject Index	563
Author Index to Volumes 1 and 2	573
