Chapter 1 Adhesives in Construction	
Types of Adhesive Applications	1
Service Environments	2
Why Bond With Adhesives?	3
Selecting From the Adhesives Available	3
In-Plant Bonding and Onsite Bonding	4
Surveying This Handbook	4
Future Developments	6
Chapter 2 Typical Applications	
Plant Bonding Applications	7
Onsite Bonding Applications	24
Background Material	30
Chapter 3 Structural Design Considerations Adhesive-Bonded Joints in Component	
Parts	33
Adhesive-Bonded Assemblies	34
Adhesive Mechanical Properties	42
Background material	43
Chapter 4 Substrates	
Substrate Properties Important to Bonding	45
Types of Substrates and Their Characteristics	47
Background material	65
Chapter 5 Adhesives	
Selection of an Adhesive	66
Types of Adhesives Available	73
Background Material	83
Chapter 6 Equipment for Fabrication	
Storing	84
Mixing	85
Pumping	86
Applying	88
Spray Application	93
Curtain Coating	95
Pressing	96
Nailing or Stapling	103
Materials Used in Equipment	104
Chapter 7 General Bonding Techniques	
Preparation of Adherends for Bonding	106
Preparation of the Adhesive	108
Bonding of Adherends with Adhesives	110
Conditioning of Joints After Bonding	115
Background Material	116
Chapter 8 Test Methods and Specifications	
Sources of Test methods and Specifications	118
Measurement of Adhesive Properties	121
Test Development needs	123
Specifications	123
A Partial List of Standards and Specifications	124
A Partial List of Organizations Involved with Standards	127
Background material	128
Chapter 9 Inspection and Control	
The Quality-Control Department	129

Role of the Independent Testing Agency	131
Role of the Regulatory Body	132
In-Plant Quality Inspection	132
Onsite Bonding and Quality Control	145
Glossary	146
Index	158
