

CONTENTS

| | Page |
|---|------|
| Introduction | 1 |
| I Autohesion of High Polymers | 5 |
| A General Remarks | 5 |
| B Methods for the Determination of Autohesion | 6 |
| C The Diffusion Nature of Autohesion | 15 |
| D Self-Diffusion in High Polymers | 19 |
| II Factors Affecting Autohesion | 25 |
| A Conditions for the Formation of an Adhesive Bond | 25 |
| B Effect of the Conditions of the Determination on the Magnitude of Autohesion | 31 |
| C Effect of High Polymer Properties on Autohesion | 33 |
| D Effect of Certain Technological Factors on Autohesion | 50 |
| E Autohesion of Low-Tacky Surfaces | 59 |
| III Autohesion and Formation of Films from High Polymer Dispersions | 63 |
| A Effect of High Polymer Autohesion on Film-Forming Capacity of Dispersion | 64 |
| B Effect of the Nature and Amount of Stabilizer on Film Formation Ability of High Polymer Dispersions | 66 |
| C The Role of Autohesion in the Formation of Films From High Polymer Dispersions | 74 |
| D The Role of Autohesion in the Formation of Films from Vulcanized Latexes | 80 |
| IV Role of Autohesion in Welding Organic Glasses and Fabricating Articles from Molding Powders | 89 |
| A Autohesion and Welding Organic Glasses | 89 |
| B The Importance of Autohesion for the Preparation of Articles from Molding Powders | 111 |
| V Adhesion of High Polymers | 117 |
| A General Remarks | 117 |
| B Methods of Adhesion Determination | 119 |
| C Thermodynamics of Adhesion | 123 |
| D Earlier Works on Adhesion | 126 |
| E Adsorption Theory of Adhesion | 128 |
| F Electrical Theory of Adhesion | 134 |
| G Diffusion Theory of Adhesion | 140 |
| VI Factors Affecting Adhesion | 149 |
| A Effect on Adhesion of Conditions for Forming an Adhesive Joint | 149 |
| B Effect of the Testing conditions on Adhesion | 158 |
| C Effect on Adhesion of the Nature of Adhesive and Substrate | 165 |
| D The Effect of Some Technological Factors on Adhesion | 171 |
| VII Effects of Mechanical and Chemical Treatment of Substrate Surface on Adhesion | 179 |
| A Effects of Mechanical Treatment of Substrate Surface on Adhesion | 179 |
| B Effects of Chemical Treatment of Substrate Surface on Adhesion | 185 |
| VIII Adhesion of High Polymers to Metals | 197 |
| A General Remarks | 197 |
| B Methods of Determining Adhesion of High Polymers to Metals | 203 |
| C Chemical Theories of Polymer-to-Metal Adhesion | 205 |

| | | |
|----|---|-----|
| D | Physical theories of Polymer-to-Metal Adhesion | 214 |
| E | Certain Other Views on Polymer –to-Metal Adhesion | 225 |
| F | Conclusions | 233 |
| IX | Tackiness of high Polymer Solutions | 235 |
| A | Methods of Determining Tackiness and Its nature | 235 |
| B | Spinnability of High Polymer Solutions | 241 |
