

CONTENTS

PROCESS IMPROVEMENTS AND POLYMERIZATION KINETICS

1. Polymerization Reaction Engineering	1
2. Free Radical Polymerization Kinetics of Immobilized Chains	25
3. Keto-Enol Tautomers as Polymerization Initiators	46
4. Terpolymerization Parameters	64
5. Polymerization of Methyl Methacrylate and Other Vinyl Monomers Activity by Low Concentrations of SO ₂	75
6. Donor-Acceptor Molecular Complexes in alternating Copolymerization and in the Polymerization of Metal Halide-Complexed Vinyl Monomers	94
7. ESR Studies of Vinyl Polymerization in Solution	125
8. Molecular Weight Distribution for Polymerization in Two-Phase Systems	145
9. Growth of Polymer Particles in Vinyl Chloride Emulsion Polymerization	158
10. Emulsion Copolymerization of Vinyl Ester of Branched Carboxylic Acids with Vinyl Acetate	178
11. Freeze/Thaw Stability of Polymer Emulsions	188
12. Radiation-Induced Ionic Polymerization	202
13. Pulse Radiolysis of Styrene and α -Methylstyrene	219
14. The Solid State Polymerization of Hexamethylcyclotrisiloxane	229
15. Mechanisms of Propagation of Ionic Polymerizations	236
16. Multistate Stereospecific Polymerization Mechanism	250
17. Anionic Free Radical Polymers of α -Olefins	268
18. Olefin Polymerizations and Copolymerizations with Alkylaluminum-Cocatalyst Systems	287
19. Stereospecific Polymerization of 1,3-Butadiene Initiated by the Transition Metal π -Complexes	306
20. Mechanisms for Initiating Polymerization by Stable Organic Cations	317
21. The Nature and Influence of Gegenions in Tetrahydrofuran Polymerization	335
22. Block and Random Copolymers by Cationic Copolymerization	350
23. Cationic Polymerization and Copolymerization of Trioxane	359
24. Cationic Copolymerization of Trioxane and 1,3-Dioxolane	371
25. Polymerization and Copolymerization of Olefins on Chromium Oxide Catalysts	387
26. Ring-Opening Polymerization of Cycloolefins	399

POLYMERS AT WILL

27. Chemical Reactions of Model Polyenes and Macromolecular Polyenes	419
28. Copolymerization with Depropagation	439
29. Preparation of Carboxy-Terminated Polyisobutylene	448
30. The Role of Structural Phenomena in Polymerization	465
31. Graft Polymerization of Vinyl Compounds on Ethylene–Vinyl Acetate Copolymers	477
32. The Internal Crosslinking of Styrene Copolymers	489
33. Expandable Polystyrene Processes	513
34. Expandable Olefin-Sulfur Dioxide Copolymers from Suspension Polymerization	529
35. A Flame Resistant ABS-Type Polymer from Terpolymerization with a Novel Bromine-Containing Monomer	536
36. Radiation-Grafted Polyelectrolytes on Polymer Surfaces	542
37. Preparation of Permselective Membranes by Radiation Grafting of Hydrophilic Monomers into Polytetrafluoroethylene Films	560
38. Cellulose Graft Copolymers	574
39. Mobility of Methyl Groups in Polycarbonate and in Poly-x-methylstyrene Analyzed by Nuclear Resonance	592
40. New Polycondensation Polymers	612
41. The Diels-Alder Reaction in Polymer Synthesis	628
42. Recent Advances in the Vapor Deposition Polymerization of p-Xylylenes	643
43. Polyphenylene Oxides by Oxidative Coupling	660
44. Polymerization of Primary Aromatic Diamines to Azopolymers by Oxidative Coupling	679
45. The Kinetics of Solution Polycondensation of Aromatic Polyethers	692
46. Preparation and Properties of Aromatic Polysulfonates	703
47. The polymerization of B-Carboxymethyl Caprolactam	717
48. Structure and Properties of a Heterocyclic Polymer	734
Index	757
