

CONTENTS

| | |
|--|------------|
| Chapter 1 Quantitative determination of known additives | 1 |
| 1.1 General discussion | 1 |
| 1.2 Direct examination of polymer | 2 |
| 1.3 Preliminary extraction of additives from polymer | 22 |
| 1.4 Determination of phenolic antioxidants | 35 |
| 1.5 Determination of amine antioxidants | 66 |
| 1.6 Determination of plasticizers | 70 |
| 1.7 Determination of ultraviolet absorbers and optical brightness | 81 |
| 1.8 Determination of Polygard | 87 |
| 1.9 Determination of diorganosulphide and tertiary phosphite antioxidants | 92 |
| 1.10 Determination of organic peroxides | 98 |
| 1.11 Determination of styrene, acrylonitrile and methacrylonitrile | 106 |
| 1.12 Determination of organotin and other organometallic stabilizers in PVC | 115 |
| | |
| Chapter 2 Identification of additives by direct examination of solvent extracts of polymers | 130 |
| | |
| Chapter 3 Application of thin-layer and column chromatography to the separation and determination of unknown additive mixtures | 140 |
| | |
| Chapter 4 Application of chromatography followed by spectroscopy to the identification and Determination of unknown additive mixtures | 217 |
| 4.1 Column chromatography | 218 |
| 4.2 Paper chromatography | 230 |
| 4.3 The powerful combination - thin-layer chromatography and spectroscopy | 235 |
| | |
| Chapter 5 Application of gas chromatography | 264 |
| 5.1 Characterization and determination of additives | 264 |
| 5.2 Characterization and determination of monomers and volatiles | 296 |
| | |
