

## CONTENTS

### PART ONE

#### Materials

Cellulose Acetate	7
Cellulose Acetate Butyrate	10
Polyethylene	15
Polyester (Mylar) and Polyester Laminates	20
Impact Polystyrene	27
Oriented Polystyrene	32
ABS-Type Plastics	38
Vinyls	42
Rigid Vinyl Sheet (Geon)	46

### PART TWO

#### Methods

Continuous Vacuum Forming	59
Pressure Forming	63
AirSlip Forming	70

### PART THREE

#### Packaging Applications

“Show” Business Means More Business!	75
Pens in Skin and Other Packages	82
New Notions for Notions	86
Equipment Trends in Visual Packaging	89

### PART FOUR

#### Industrial Applications

Vacuum-Forming the Refrigerator Inner Door panel	95
Some Custom-Thermoforming Application	101
Cost Considerations in Industrial Applications of Plastic Sheet Forming	108

### PART FIVE

#### Progress and Prospects

The Explosive Growth of Plastic Sheet Forming	119
Trends in Packaging: A Converter's View	122
The Application of Plastics to Stage Scenery Construction	131
The Role of Formed Plastics in the World of Tomorrow (A Presentation by Monsanto Chemical Company)	
I. The Shape of Things to Come	134
II. The Future for Thermoforming	137
