

CONTENTS

1. Introduction	1
2. Heating of the Plastic	3
Means of conveying heat	3
Thermal properties of plastics	9
Heating equipment for plastic sheets	10
Judging the correct temperature of the heated sheet	21
Clamping of sheets	25
3. Thermoforming Molds	27
Reduction in wall thickness, male and female molds	27
Part shrinkage and dimensional tolerances	34
Draft in the mold	36
Surface appearance	37
Mold materials	38
Mold cooling provisions	39
Air passage holes	39
Increasing stiffness	42
Mold plugs	42
4. Vacuum, Air Pressure and Mechanical Forces	45
Measuring vacuum and pressure forces	45
Vacuum sources	46
Vacuum accumulators or surge tanks	46
Application of vacuum forces	47
Pressure forming	48
Mechanical forming	50
5. Cooling of Thermoformed Parts	53
Means of cooling the formed part	53
Non-conventional cooling methods	55
6. Trimming of Thermoformed Parts	57
Tools for trimming	57

7. Thermoforming Equipment	61
Single station thermoformer	62
Shuttle thermoformer	64
Rotary thermoforming equipment	65
Continuous thermoformers	67
Inline thermoformer	76
Pneumatic thermoformers	79
Hydraulically operated thermoformers	79
Mechanically operated thermoformers	80
Skin packaging equipment	80
Blister packaging equipment	80
Snap packaging	81
Vacuum packaging	81
Packaging machinery	81
Control mechanisms	85
8. Materials Suitable for Thermoforming	87
Softening range and hot strength	88
Specific heat	90
Thermal conductivity	90
Thermal expansion	91
Heat of fusion	91
Thermal diffusivity	92
Thermal stability	93
Water absorption	93
Orientation and crystallization	94
Manufacture of materials	99
Coextrusions and laminates	100
Mechanical properties	102
Material economics	103
Materials descriptions	105
9. Forming Processes	117
Billow, bubble or free forming	117
Cavity forming	119
Drape forming	121
Plug-assist forming	121
Billow drape forming	123
Snap-back forming	124
Air slip forming	124

Reverse draw with plug-assist forming	125
Trapped sheet pressure forming	127
Twin sheet forming	127
Pressure forming	127
Mechanical thermoforming	127
Other thermoforming processes	132
Adjusting process parameters	132
Thermoforming troubleshooting guide	133
10. Design Considerations	137
Assembly and bonding	138
Rigidizing thermoformed parts	139
Finishing thermoformed parts	142
11. Related Forming Processes	145
Forming processes performed at lower temperatures	146
Packaging container forming	148
12. Processes Competing with Thermoforming	151
Injection and extrusion molding	151
Blow molding	152
Rotomolding	152
Plastisol or slush molding	152
Summary remarks to related and competing processes	152
Appendices	155
Index	215
