Preface	xiii
Authors	xvii
1 Fabrication Processes.....	1-1
1.1 Types of Processes	1-1
1.2 Tooling for Plastics Processing.....	1-1
1.2.1 Types of Mold	1-2
1.2.2 Types of Dies.....	1-2
1.2.3 Tool Design	1-3
1.3 Compression Molding.....	1-4
1.3.1 Open Flash.....	1-5
1.3.2 Fully Positive.....	1-5
1.3.3 Semipositive	1-5
1.3.4 Process Applicability	1-5
1.4 Transfer Molding.....	1-6
1.4.1 Ejection of Molding	1-8
1.4.2 Heating System	1-8
1.4.3 Types of Presses	1-9
1.4.4 Preheating	1-9
1.4.5 Preforming	1-10
1.4.6 Flash Removal.....	1-10
1.5 Injection Molding of Thermoplastics	1-10
1.5.1 Types of Injection Units	1-11
1.5.2 Clamping Units	1-13
1.5.3 Molds.....	1-13
1.5.3.1 Mold Designs.....	1-13
1.5.3.2 Number of Mold Cavities.....	1-14
1.5.3.3 Runners	1-15
1.5.3.4 Gating.....	1-15
1.5.3.5 Venting.....	1-17
1.5.3.6 Parting Line	1-17
1.5.3.7 Cooling.....	1-17
1.5.3.8 Ejection	1-17
1.5.3.9 Standard Mold Bases	1-18
1.5.4 Structural Foam Injection Molding	1-18
1.5.5 Co-Injection (Sandwich) Molding	1-18
1.5.6 Gas-Assisted Injection Molding	1-20
1.6 Injection Molding of Thermosetting Resins.....	1-21
1.6.1 Screw-Injection Molding of Thermosetting Resins	1-21

1.14	Reaction Injection Molding	1-62
1.14.1	Machinery	1-64
1.14.2	Polyurethanes	1-64
1.14.3	Nylons	1-65
1.15	Structural Reaction Injection Molding	1-65
1.15.1	Applications	1-66
1.16	Resin Transfer Molding	1-66
1.17	Foaming Processes	1-67
1.17.1	Rigid Foam Blowing Agents	1-69
1.17.2	Polystyrene Foams	1-69
1.17.2.1	Extruded Polystyrene Foam	1-70
1.17.2.2	Expandable Polystyrene	1-70
1.17.2.3	Structural Foams	1-71
1.17.3	Polyolefin Foams	1-72
1.17.4	Polyurethane Foams	1-76
1.17.4.1	Flexible Polyurethane Foams	1-76
1.17.4.2	Rigid and Semirigid Foams	1-79
1.17.5	Foamed Rubber	1-80
1.17.6	Epoxy Resins	1-80
1.17.7	Urea-Formaldehyde Foams	1-81
1.17.8	Silicone Foams	1-82
1.17.9	Phenolic Foams	1-83
1.17.10	Poly(Vinyl Chloride) Foams	1-83
1.17.11	Special Foams	1-86
1.18	Rubber Compounding and Processing Technology	1-88
1.18.1	Compounding Ingredients	1-88
1.18.1.1	Processing Aids	1-94
1.18.1.2	Fillers	1-95
1.18.2	Mastication and Mixing	1-96
1.18.2.1	Open Mill	1-96
1.18.2.2	Internal Batch Mixers	1-97
1.18.3	Reclaimed Rubber	1-99
1.18.4	Some Major Rubber Products	1-100
1.18.4.1	Tires	1-100
1.18.4.2	Belting and Hoses	1-102
1.18.4.3	Cellular Rubber Products	1-104
1.19	Miscellaneous Processing Techniques	1-104
1.19.1	Coating Processes	1-104
1.19.1.1	Fluidized Bed Coating	1-106
1.19.1.2	Spray Coating	1-106
1.19.1.3	Electrostatic Spraying	1-106
1.19.2	Powder Molding of Thermoplastics	1-107
1.19.2.1	Static (Sinter) Molding	1-107
1.19.2.2	Rotational Molding	1-107
1.19.2.3	Centrifugal Casting	1-108
1.19.3	Adhesive Bonding of Plastics	1-108
1.19.3.1	Solvent Cementing	1-109
1.19.3.2	Adhesive Bonding	1-110
1.19.3.3	Joining of Specific Plastics	1-110
1.19.4	Welding	1-114
1.19.4.1	Hot-Gas Welding	1-114
1.19.4.2	Fusion Welding	1-114
1.19.4.3	Friction Welding	1-115
1.19.4.4	High-Frequency Welding	1-115

	1.19.4.5 Ultrasonic Welding.....	1-115
1.20	Decoration of Plastics	1-115
	1.20.1 Painting	1-116
	1.20.2 Printing	1-116
	1.20.2.1 Gravure Printing.....	1-116
	1.20.2.2 Flexography.....	1-117
	1.20.2.3 Screen Process Printing	1-117
	1.20.2.4 Pad Printing	1-117
	1.20.3 Hot Stamping	1-117
	1.20.4 In-Mold Decorating.....	1-118
	1.20.5 Embossing.....	J-118
	1.20.6 Electroplating.....	1-119
	1.20.7 Vacuum Metallizing.....	1-119
	References	1-120

2	Recycling of Polymers	2-1
2.1	Introduction	2-1
2.2	Outline of Recycling Methods	2-2
2.3	Recycling of Poly(Ethylene Terephthalate)	2-8
	2.3.1 Direct Reuse	2-8
	2.3.2 Reuse after Modification	2-9
	2.3.2.1 Glycolysis.....	2-10
	2.3.2.2 Methanolysis	2-12
	2.3.2.3 Ammonolysis	2-12
	2.3.2.4 Hydrolysis	2-12
	2.3.2.5 Depolymerization in Supercritical Fluids	2-13
	2.3.2.6 Enzymatic Depolymerization	2-13
	2.3.3 Incineration	2-14
2.4	Recycling of Polyurethanes	2-15
	2.4.1 Thermopressing Process.....	2-15
	2.4.2 Kneader Process	2-16
	2.4.3 Hydrolysis	2-17
	2.4.3.1 Glycolysis.....	2-17
	2.4.3.2 Ammonolysis	2-17
2.5	Recycling of Poly(Vinyl Chloride)	2-19
	2.5.1 Characterization of Used PVC.....	2-19
	2.5.2 In-Line PVC Scrap	2-20
	2.5.3 PVC Floor Coverings	2-22
	2.5.4 PVC Roofing Sheets.....	2-22
	2.5.5 Post-Consumer PVC	2-22
2.6	Recycling of Cured Epoxies.....	2-23
2.7	Recycling of Mixed Plastics Waste	2-23
	2.7.1 Direct Reuse	2-24
	2.7.2 Homogeneous Fractions	2-27
	2.7.3 Liquefaction of Mixed Plastics	2-27
2.8	Post-Consumer Polyethylene Films	2-28
2.9	Recycling of Ground Rubber Tires.....	2-29
2.10	Recycling of Car Batteries	2-31
2.11	Plastic Recycling Equipment and Machinery.....	2-31
	2.11.1 Plastocompactor	2-32
	2.11.2 Debaling and Initial Size Reduction	2-32
	2.11.2.1 Shredder.....	2-33
	2.11.2.2 Cutter or Guillotine.....	2-33
	2.11.2.3 Screw Shredder	2-33

2.11.2.4	Granulators	2-33
2.11.2.5	Fine Grinding	2-34
2.11.3	Cleaning and Selection	2-34
2.11.3.1	Dry Separation	2-35
2.11.3.2	Wet Separation	2-36
2.11.3.3	Other Methods	2-37
2.11.4	Resin Detectors: Type and Configuration	2-37
2.11.5	Automatic Sortation	2-39
2.11.5.1	PVC/PET and Commingled Plastics Sortation	2-39
2.11.6	Recycle Installations	2-41
References	2-41

Appendices

A1	Index of Trade Names and Suppliers of Foaming Agents	A1-1
A2	Formulations of Polyurethane Foams	A2-1
A3	Formulations of Selected PVC Compounds	A3-1
A4	Formulations of Selected Rubber Compounds	A4-1
A5	Commercial Polymer Blends and Alloys	A5-1

Index	I-1
