

## CONTENTS

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Historical and general	
1.2	Growth and development of the thermoplastics extrusion industry	
<b>2</b>	<b>Basic principles of extrusion</b>	<b>14</b>
2.1	General	
2.2	Ram extrusion	
2.3	Wet extrusion	
2.4	Extrusion pump and spinneret extrusion	
2.5	Dry extrusion	
2.6	Screw Extrusion	
2.7	Extrusion processes	
2.8	Terminology	
<b>3</b>	<b>The modern single-screw extrusion machine</b>	<b>35</b>
3.1	General	
3.2	Screw design and basic design calculations	
3.3	Variation of screw design with materials and die characteristics	
3.4	Types of screw	
3.5	Heat and power requirements	
3.6	Residence time	
3.7	Surging of pulsating	
3.8	Adiabatic extrusion	
3.9	Two-stage screw	
3.10	Pressure Control	
3.11	Intermittent extrusion	
<b>4</b>	<b>Multi-screw extrusion machines</b>	<b>90</b>
4.1	General and historical	
4.2	Theoretical considerations	
4.3	Modern multi-screw machines	
4.4	Comparisons between the characteristics of multi-screw and single-screw machines	

<b>5</b>	<b>Extruders for special purpose or of unorthodox design</b>	<b>110</b>
5.1	Introduction	
5.2	extruders for large sections	
5.3	Vertical extruders	
5.4	Extruders for compounding and mixing	
5.5	Extruders of unorthodox design	
<b>6</b>	<b>Constructional features of screw extruders</b>	<b>141</b>
6.1	Introduction	
6.2	Screw	
6.3	Barrel	
6.4	Heating and heat control	
6.5	Cooling	
6.6	Hopper design	
6.7	Thrust bearing features	
6.8	Reduction gear and drive motor	
6.9	Machine base	
6.10	Computer control of the extrusion process	
6.11	Ultrasonic control	
<b>7</b>	<b>Materials for extrusion</b>	<b>173</b>
7.1	General	
7.2	Extrusion compounds	
7.3	Notes on the extrusion of various thermoplastics	
<b>8</b>	<b>Dies for extrusion</b>	<b>195</b>
8.1	General	
8.2	Some aspects of die design theory	
8.3	Practical extrusion dies	
8.4	Typical extrusion dies	
8.5	Extrusion sizing or calibration systems	
<b>9</b>	<b>The complete extrusion process</b>	<b>247</b>
9.1	Introduction	
9.2	Wire covering	
9.3	Sheet and flat film	
9.4	Tubular film	
9.5	Extrusion coating	
9.6	Tube and pipe	
9.7	Profile take-off	

9.8	Monofilament plant	
9.9	Coextrusion processes for sheet and film	
9.10	Cellular extruded products	
<b>10</b>	<b>Other important plastics techniques based on extrusion</b>	<b>301</b>
10.1	Introduction	
10.2	Injection moulding	
10.3	Blow moulding	
10.4	Continuous thermoforming	
10.5	The preparation of materials for extrusion and injection moulding	
10.6	Scrap reclamation	
<b>11</b>	<b>The extrusion of thermosets</b>	<b>325</b>
11.1	History and general	
11.2	Basic principles of the process	
11.3	Differences and difficulties compared with thermoplastics extrusion	
11.4	Extrusion of reinforced plastics	
11.5	Conclusion	
	Appendix – List of symbols used in this book	337
