

CONTENTS

1-1	Decorative Laminates – A New Era	5-7
1-2	Core Stock Paper	8-21
1-3	A Comparison of Base Papers for High	8-21
1-4	Overlays and the Interaction Between Overlay, Décor Barrier	8-21
2-1	Engraving	8-21
2-2	Printing Inks	22-24
2-3	Printing	22-24
2-4	Malamine and the Laminating Industry	25-30
2-5	Phenolic Resins for High Pressure Decorative Laminates	31-40
2-6	The Resins Binder - Polyester	31-40
3-1	Paper Treatment — Coating Impregnating and Drying	31-40
3-2	Heat Recovery and Thermal Incineration as Related to the Manufacture of Plastic Laminates	41-56
3-3	Adhesives for High Pressure Laminates	41-56
3-4	Release Media - Foil and Paper	57-60
4-1	Modern Presslines for the Production of Decorative Laminated	61-68
4-2	Advantages and Limits of Short Cycle Pressing Systems for Laminating Wood Based Panels	69-82
4-3	Finishing Lines for Decorative Laminates	83-87
4-4	Laminate from the Consumer's Viewpoint	83-87
5-1	The Manufacture of Particleboard	83-87
5-2	The Technical Development of Decorative Lamination of Chipboard by Application of Aqueous, Melamine — Formaldehyde — Impregnating Resin Grades as seen for last 10 years	88-89
5-3	Edge Banding Short Cycle Laminates	99-101
5-4	Postforming and Postforming Equipment	102-104
5-5	Applications of Decorative Laminates	102-104
