Section I Theory of Ultrasonics	1
1 Introduction and Prospects	3
2 Ultrasonic Concepts	11
3 Biological Applications	18
4 Equipment and Methodology	29
Section II Equipment and Processing	41
5 High-Intensity Systems	43
6 Ultrasonic Welding of Plastics	54
7 Ultrasonic Inserting and Staking	68
Section III Applications	77
8 Assembly, Fastening, and Joining	79
9 Joint Designs	100
10 Rotary Processing Techniques	109
11 Ultrasonic Degating of Molded Parts	115
12 Ultrasonic Soldering	120
13 Ultrasonic Aerosolization	131
14 Ultrasonic in Plastics Fabrication	136
15 Ultrasonic Sewing	151
Appendix A	
Glossary of Ultrasonic Terms	161
Appendix B	163
Federal Conformance	166
