

CONTENTS

Chapter 1. GENERAL CONCEPTS

1.1	History of Coupling Agents	1
1.2	Definitions	4
1.3	Evaluation	6
1.4	Nonsilane Coupling Agents	15
1.5	Theories of Bonding Through Coupling Agents	18
	References	28

Chapter 2. CHEMISTRY OF SILANE COUPLING AGENTS

2.1	Introduction	31
2.2	Formation of the Si—C Bond	32
2.3	Reactions of Hydrolyzable Groups on Silicon	33
2.4	Organofunctional groups on Silicon	36
	References	53

Chapter 3. AQUEOUS SOLUTIONS OF SILANE COUPLING AGENTS

3.1	Introduction	55
3.2	Alkoxysilanes with Neutral Organofunctional Groups	55
3.3	Cationic-Organofunctional Silanes	63
3.4	Anionic-Organofunctional Silanes	70
3.5	Zwitterion-Organofunctional Silanes	71
3.6	Stabilization of Aqueous Silicate Solution	72
	References	78

Chapter 4. SURFACE CHEMISTRY OF SILANES AT THE INTERFACE

4.1	Introduction	79
4.2	Uninstrumental Techniques	80
4.3	Identifying Silane at the Interface	82
4.4	Thickness of Silane Layers	87
4.5	Orientation of Layers	94
4.6	Chemical Reactions at the Interface	101
	References	113

Chapter 5. NATURE OF ADGESION THROUGH SILANE COUPLING AGENTS

5.1	Problems in Organic-Inorganic Composites	115
5.2	Silanol Bonds with Mineral Surfaces	120
5.3	Bonding to Metals	134
5.4	Silane Bonds with Polymers	144
	References	151

Chapter 6. PREFORMANCE OF SILANE COUPLING AGENTS

6.1	General	153
6.2	Unsaturated Polyesters	153
6.3	UV-Curable Coatings	158
6.4	Epoxy Resins	159
6.5	Phenolic Resins	166
6.6	High-Temperature Resins	168
6.7	Other Polymers	170
6.8	Coatings	171
6.9	Specific Primers	175
	References	181

Chapter 7. PARTICULATE-FILLED COMPOSITES

7.1	The Total Picture	183
7.2	Fracture	185
7.3	Effects of Filler Surfaces on Polymer Properties	189
7.4	Rheology	195
7.5	Coupling and Adhesion	201
7.6	Methods of Application Silanes	216
	References	219

Chapter 8. OTHER APPLICATIONS OF SILANE COUPLING AGENTS

8.1	General	221
8.2	Alkyl-Silylated Surfaces	22
8.3	Charge Transfer Chromatography	228
8.4	Bound Chelate-Functional Silanes	230
8.5	Antimicrobials	239
8.6	Polypeptide Synthesis and Analysis	241
8.7	Immobilized Enzymes	242
8.8	Coated Metal Oxide Electrodes	247
8.9	Liquid Crystals	248
	References	249
