

CONTENTS

Chapter 1	Electrical Processes in the Plastics Industry	1
Chapter 2	Fundamentals of Electrotechnology	4
Chapter 3	The Chemical and Physical Properties of Plastics and their Effect on processing	20
Chapter 4	Heat Transfer Processes	30
Chapter 5	Primary Fabrication processes	37
Chapter 6	The Fabrication of Pre-Formed Sections	50
Chapter 7	Indirect Heating Processes	59
Chapter 8	High Frequency Heating Processes	66
Chapter 9	Radiation Processes	85
Chapter 10	Electrical Methods of Deposition and Surface Treatment	93
Chapter 11	The Measurement and Recording of Electrical Variables	100
Chapter 12	The Measurement of Non-Electrical Quantities	110
Chapter 13	Control Methods and Systems	119
Appendix 1	Principal Plastics and Fabrication Processes	134
Appendix 2	Plastic Fabrication Processes and their Applications	135
Appendix 3	Methods of Energy Transfer to Plastics during Fabrication	137
Index		139
