

CONTENTS

Expanded Plastics Based on Polystyrene and Polyvinyl Chloride	1
Production of Expanded Polystyrene with Various Blowing Agents	37
Hollow Expanded Plastics	44
The Manufacture of Articles from Expanded Polystyrene using a Polymer-Monomer Paste	48
Technology and Properties of an Expanded Polystyrene Aerial Fairing	62
Expanded Plastics Based on Phenol-Formaldehyde Resins and their Combination with Rubbers and Fillers	85
The Use of Expanded Plastics FK-20-ST in the Manufacture of Aerial Reflectors for Radio-electronic Aircraft Apparatus	110
The Use of Expanded Polyurethane Plastics in Aircraft Structures	121
Recent Western Advances	157
INDEX	165
