

CONTENTS

1. INTRODUCTION	1
2. FLOW BEHAVIOUR OF THERMOPLASTIC MELTS	6
2.1 Relations between stress and deformation	7
2.2 Thermal relations	15
2.3 Flow equations and boundary conditions	17
2.4 Basic solutions	23
2.5 Viscometry	31
2.6 Complex flows	45
Die swell	48
Instability	53
Melt fracture	55
2.7 The lubrication approximation	60
2.8 Inhomogeneous and anisotropic melts. Mixing and orientation	63
3. CONTINUOUS PROCESSES	67
3.1 Calendering	68
3.2 Single-screw extrusion	77
3.3 Flow in dies	91
Basic flow analysis	96
Basic die design	102
Extruder-die systems	107
3.4 Fibre spinning	111
The extrusion zone	113
The hot draw-down zone	114
The cool draw-down zone	119
3.5 Film casting and blowing	120
Film casting	120
Film blowing	123
4. CYCLIC PROCESSES	127
4.1 Injection moulding	128
4.2 Blow moulding	134
