

Contents

Preface	iii
Contributors	vii
1. General Introduction to Plastics Analysis <i>Hubert Lobo and Jose V. Bonilla</i>	1
2. Capillary Rheometry <i>Burke Nelson</i>	43
3. Practical Uses of Differential Scanning Calorimetry for Plastics <i>Andrew W. Salamon and Kenneth J. Fielder</i>	79
4. Thermogravimetric Analysis of Polymers <i>Scott Kinzy and Robert Falcone</i>	111
5. Thermal Conductivity and Diffusivity of Polymers <i>Hubert Lobo</i>	129
6. Thermomechanical and Dynamic Mechanical Analysis <i>Kevin P. Menard</i>	155
7. Infrared and Raman Analysis of Polymers <i>Koichi Nishikida and John Coates</i>	201
8. Plastics Analysis by Gas Chromatography <i>Jose V. Bonilla</i>	341

9. Nuclear Magnetic Resonance of Polymeric Materials <i>Anita J. Brandolini</i>	403
10. Inorganic Analyses of Polymers <i>John Lemmon and Galina Georgieva</i>	511
11. Liquid Chromatography of Polymers <i>Gary J. Fallick and Rick Nielson</i>	549
12. Particle Size Measurement of Plastics and Polymers Using Laser Light Scattering <i>Philip Plantz</i>	593
Appendix: ASTM Methods for Analysis of Plastic and Rubber Materials	613
Index	629
