

## CONTENTS

<b>Chapter 1 Introduction</b>	<b>1</b>
The nature of reinforced plastic – Plastics – Reinforced plastics – Glass fibre – Carbon Fibre – Polyester resins – Applications	
<b>Chapter 2 Gelation and Hardening</b>	<b>11</b>
Storage life – Catalysts and accelerators – Pre-accelerated resins – The curing reaction – Hot curing – Cold curing – Rapid hardening formulation – Alternative cold curing system – Factors affecting gel time – Formulations – Pigments – Fillers – Plasticiser – Mixing – Control of gelation – Pot life – Spray formulations	
<b>Chapter 3 Unreinforced Crystic Resin</b>	<b>25</b>
Body stopper – Surface coating – Button casting – Embedding and potting – Flooring – Piper joints – Polyester mortar – Polyester marble – Abrasive compound	
<b>Chapter 4 Contact Moulding</b>	<b>39</b>
Introduction – Moulds – Release agents – Self-releasing gel coat – The gel coat – Hand lay-up – Spraying – Heat-assisted curing – Heated moulds – Mould release – Post-curing – Trimming and finishing – Workshop conditions	
<b>Chapter 5 Machine Moulding</b>	<b>51</b>
Sheeting manufacture – Extrusion – Filament winding - Centrifugal moulding – Matched die moulding – Hot press moulding – Preform moulding – Moulding compounds – Cold press moulding – Resin injection moulding	
<b>Chapter 6 Quality Control</b>	<b>63</b>
Common faults – Repair – Inspection – Resin/glass ratio – Degree of cure – Control of variables	
<b>Chapter 7 Flame Retardant Laminates</b>	<b>77</b>
Introduction – Self-extinguishing Crystic resins – Crystic Fireguard – Flammability specifications	
<b>Chapter 8 GRP as a Structural Material</b>	<b>85</b>
General concepts – Stiffness – Sandwich construction – Choice of reinforcement – Composite construction – Design tips – Cost – Performance	

<b>Chapter 9 Precautions</b>	<b>106</b>
Storage precautions – Operating precautions	
Appendix 1 Addresses	108
Scott Bader	
Licensees	
Appendix 2 Bibliography – Other addresses	110
Appendix 3 S I Units	112
Index	116
