

Contents

1. Introduction	3
2. Thermosetting Composites	3
3. Epoxy Resins.....	3
3.1 Chemorheology and Curing of Epoxy.....	5
4. Epoxy Composites	5
4.1 Fracture Testing.....	7
4.2 Fracture Mechanism.....	7
5. Impact Resistant Epoxy Composites.....	8
6. Modification of Epoxy Matrix	8
6.1 Flexibilisation of Epoxy	8
6.2 Toughening of Epoxy	9
6.3 Liquid Rubber Toughening.....	9
6.3.1 Reaction-induced Phase Separation.....	9
6.3.2 Mechanism of Toughening.....	11
6.3.3 Morphological Parameters	11
6.3.4 Recent Advances	13
6.4 Toughening by Preformed Particle.....	15
6.5 Thermoplastic Toughening.....	16
6.6 Rigid Particle Toughening.....	17
7. Nanoreinforcement of Epoxy	17
7.1 Clay Reinforced Epoxy	17
7.2 CNT-Reinforced Epoxy.....	20
8. Simultaneous Nanoreinforcement and Toughening	21
9. Fire Retardant Epoxy Composites	22
9.1 Flammability and Smoke Tests	22
9.1.1 UL-94 Flammability Test.....	22
9.1.2 Cone Calorimetry.....	22
9.1.3 LOI Test	22
10. Fire Retardant Resin Compositions	23
10.1 Halogenated Flame Retardants.....	23
10.2 Phosphorus Containing Flame Retardants	23
10.3 Nanoclay-Based Flame Retardants	24
10.4 Combination of Organoclay and Other Flame Retardants	26
10.5 Intumescent Fire Retardants	26
11. Summary and Outlook	26

12. List of Abbreviation and Acronyms	27
13. Additional References	27
Subject Index	99
Company Index.....	115
