

## CONTENTS

**CHAPTER 1. General Discussion**

1.1 Chemistry and Molecular Structure of the Silicones	1
1.2 Nomenclature	9
1.3 Historical Survey	16
1.4 Economics	21
References	22

**CHAPTER 2. Preparation of Silicones with Nonfunctional Organic Substituents**

2.1 Monomers in Silicone Chemistry	24
2.2 Direct Syntheses	26
2.3 Organometallic Syntheses	41
2.4 Syntheses by the Reaction of Hydrocarbons with Silanes	49
2.5 Substituent Exchange	57
References	61

**CHAPTER 3. Monomeric Organosilicon Compounds  $R_nSiX_{4-n}$** 

3.1 Tetraorganosilanes	68
3.2 Organohalosilanes and Tetrahalosilanes	69
3.3 Organo (organooxy) silanes	81
3.4 Organo-H-silanes	87
3.5 Organosilanes with Silicon-Metal Bonds	93
3.6 Organosilanols	94
3.7 Organosilanolates	101
3.8 Organoaminosilanes (Organsilylamines)	103
3.9 Organosilanethiols	108
3.10 Organoacyloxysilanes	108
3.11 Organosilyl Sulfates, Phosphates, and Perchlorates	111
3.12 Organocyanosilanes, Organoisocyanatosilanes, and Organoisothiocyanatosilanes	112
References	116

**CHAPTER 4. Organosilanes with Organofunctional Groups**

4.1 Organofunctional Silanes in Silicone Chemistry	124
4.2 Industrial Availability	126
4.3 Silanes with Unsaturated Organic Groups	129
4.4 Fluoroorganosilanes	142
4.5 Chloroorganosilanes	147

4.6	Bromoorganosilanes	159
4.7	Hydroxyorganosilanes and Their Esters	163
4.8	Carboxyorganosilanes and Their Esters	166
4.9	Epoxyorganosilanes	171
4.10	Aminoorganosilanes	174
4.11	Cyanoorganosilanes	180
	References	183
<b>CHAPTER 5 Preparation of Polyorganosiloxanes</b>		
5.1	Hydrolytic Processes	191
5.2	Nonhydrolytic Processes	200
5.3	Syntheses by Cleavage of the Si—C Bond	208
5.4	Polymerization and Polycondensation	209
5.5	Depolymerization and Cleavage	233
	References	239
<b>CHAPTER 6. The Polymeric Organosiloxanes</b>		
6.1	Systematic Classification of Polyorganosiloxanes based on their Molecular Structure and Chemistry	246
6.2	The Various Types of Polysiloxanes	248
6.3	Siloxane Bonds in Molecules of the Silicones and Anions of Silicates	287
6.4	The Silicon—Carbon Bond, Especially as Compared with the Carbon—Carbon Bond	317
6.5	Intermolecular Forces	324
	References	327
<b>CHAPTER 7. Other Organosilicone Polymers</b>		
7.1	Heterosiloxanes	332
7.2	Organosilicone Polymers without Siloxane Bridges	347
7.3	Organosilicone Copolymers (Polysilalkylenesiloxanes, Polysilarylensiloxanes, Polysilakylensilanes, Polysilylenesiloxanes)	364
7.4	Organosilicone-Organic Copolymers	368
	References	379
<b>CHAPTER 8. Production of Technical Silicone Products from Polyorganosiloxanes</b>		
8.1	Technology of Silicone Rubber	387
8.2	Technology of Silicone Resins	409
8.3	Processing of Silicone Oils	426
	References	431

## **CHAPTER 9. Properties of Technical Products**

9.1 General Picture of the Properties of the Silicone and Its Relationship to Molecular Structure and Bond Forces	437
9.2 Properties of Technical Silicone Oils	455
9.3 Properties of Technical Silicone Greases	472
9.4 Properties of Cured Silicone Resin Films	474
9.5 Properties of Silicone Resin Moldings, Laminates, and Foams	490
9.6 Properties of Silicone Rubber	494
9.7 Physical Behavior	516
References	527

## **CHAPTER 10. Applications of Technical Silicone Products in Various Branches of Industry**

10.1 Review	531
10.2 Silicone in the Electrical Industry	532
10.3 Silicone as Materials and Auxiliaries for Machine Construction	560
10.4 Silicone as Auxiliaries in the Rubber Industry	566
10.5 Silicone as Auxiliaries in the Paint Industry	570
10.6 Silicone as Auxiliaries in the Plastics and Synthetic Fiber Industry	575
10.7 Silicone in the Glass Industry and Ceramics	579
10.8 Silicone in the Textile Industry	585
10.9 Silicone in the Leather Industry	596
10.10 Silicone in the Paper Industry	601
10.11 Silicone in the Cleaner and Polish Industry	603
10.12 Silicone in the Protection of Masonry	605
10.13 Silicone in Medicine, Pharmacy, and Cosmetics	620
10.14 Miscellaneous Applications	626
References	631

## **CHAPTER 11. Esters of Silicic Acid (Organooxysilanes and Polyorganooxysiloxanes)**

11.1 Chemistry and Constitution	639
11.2 Preparation	643
12.3 Properties and Applications	653
References	660

## **CHAPTER 12. Analytical Methods**

12.1 Chemical Methods	663
12.2 Physical and Physicochemical Methods	668
References	682

Subject Index	685
