

CONTENTS

INTRODUCTION	1
REACTION MECHANISM	3
Acid and Base Catalyzed Transesterification	3
Entry of Inhibitor into Reaction	4
Possibility of Saponification	6
Addition of Alcohols	6
Addition of Mercaptoalcohols	9
Addition of /Aminoalcohols to Acrylic Esters	9
SYNTHESIS OF METHACRYLATE RSTERS	11
General Syntheses	11
Recovery of Ester	13
Variation of Methyl Ester Alcohol Ratio	14
Progress of Reaction	17
Suitability if Inhibitor	24
Suitability of Catalyst	26
Vapor Phase Catalyst	28
Magnesium Alkoxide Catalyst	29
Ion-Exchange Catalyst	29
Alkyl and Alkenyl Esters	32
Aralkyl and Alicyclic Esters	33
Glycol Esters	34
Alkoxy Esters	35
Aminoalkyl Esters	37
Nitroalkyl Esters	39
Vinylthioalkyl Esters	40
Methacryloxyalkyl Pyrrolidinones	40
Methacryloxyalkyl Dioxolanes	41
Miscellaneous Esters	41

SYNTHESIS OF ACRYLATE ESTERS	42
General Synthesis	42
Variation in Methyl Ester Alcohol Ratio	42
Azeotrope Data	43
Recovery of Lower Acrylate	44
High Pressure Reaction	45
Alkyl and Alkenyl Esters	46
Alkoxy Esters	49
Aminoalkyl Esters	50
Nitroalkyl Esters	50
Haloalkyl Esters	50
Miscellaneous Esters	52
SYNTHESIS OF ALPHA-HALOACRYLATE ESTERS	53
SYNTHESIS OF HIGHER ALPHA-ALKYL ACRYLATE	54
TABULATION OF REACTANT CONCENTRATIONS	55
Reactant Concentrations of Methacrylate Esters	56
Reactant Concentrations of Acrylate Esters	65
Reactant Concentrations of Alpha-Haloacrylate Esters	71
Isopropenyl and Vinyl Oxazoline and Oxazine Derivatives	72
GAS CHROMATOGRAPHIC RETENTION DATA ACRYLIC ESTERS	73
LIQUID-VAPOR EQUILIBRIUM DATA	76
ADDENDUM	79
BIBLIOGRAPHY	82
AUTHOR INDEX	88
SUBJECT INDEX	91
