

CONTENTS

1 Introduction and Historical Aspects	1
References	3
2 The Monomer	5
2.1 Preparation	5
2.2 Properties	6
2.3 Chemistry	9
References	11
3 Polymerization	13
3.1 Homopolymerization	13
3.1.1 Homopolymerization by free radical initiation	13
3.1.2 Other methods polymerization	23
3.2 Copolymerization	21
3.2.1 Free radical copolymerization	23
3.2.2 Preparative methods of copolymerization	28
3.2.3 Block and graft copolymers	28
3.2.4 Ionic copolymerization	31
References	33
4 Heterogeneous Polymerization	36
4.1 Slurry Reactions	36
4.1.1 Experimental results on VDC	37
4.1.2 Mechanism	42
4.1.3 Copolymerization in slurry reactions	44
4.2 Kinetics of Polymerization in Aqueous Media	45
4.2.1 Batch emulsion polymerization	47
4.2.2 Experimental results, emulsion polymerization	49
References	52
5 Structure	55
5.1 Analysis of PVDC Structure	55
5.2 Molecular Weight	58
5.3 Crystal Structure	59
5.3.1 Conformations	60
5.3.2 Comparison of vinylidene-type structures	63
5.4 Copolymer Microstructure	64
References	65

6	The Crystalline State	67
6.1	Measurement of Crystallinity	67
6.1.1	General discussion of crystallinity	67
6.1.2	Measurement of crystal dimensions	68
6.1.3	Degree of crystallinity	69
6.2	Morphology	71
6.2.1	Morphology of “as polymerized” PVDC	71
6.2.2	Crystals from solution	74
6.2.3	Spherulitic morphology	78
6.2.4	Fibrous and oriented structures	80
6.3	Kinetics of Crystallization	82
6.3.1	Crystallization of VDC-VC copolymers	82
6.3.2	Crystallization of acrylate copolymers	82
	References	86
7	Interaction of PVDC with other Molecules	86
7.1	Solubility	86
7.1.1	Effect of solvent structure	86
7.1.2	Effect of polymer history on solubility	89
7.1.3	Solubility parameters	89
7.1.4	Solubility in solvent mixtures	91
7.2	Solution Properties	94
7.3	Permeability	97
7.4	Surface Properties	101
	References	103
8	Transitions and Mechanical Behavior	105
8.1	Transitions in PVDC	105
8.2	Effect of Copolymer Composition on Transitions	114
	References	130
9	Degradation	133
9.1	Thermal Degradation	133
9.1.1	Degradation in the solid state	133
9.1.2	Degradation of Saran copolymers and related halogenated polymers	141
9.1.3	Degradation in the molten state	144
9.2	Other Modes of Degradation	145
9.2.1	Radiation induced degradation	145
9.2.2	Base induced degradation	147
9.2.3	Degradation in solution	152
9.2.4	Acid catalyzed degradation	154

10 Carbonization of Saran	158
10.1 Chemistry of Saran Carbon	159
10.1.1 Preparative methods	159
10.1.2 Structure	163
10.1.3 Morphology	166
10.2 Properties and Uses	167
10.2.1 Adsorptive properties	167
10.2.2 Other properties	170
10.2.3 Material properties	170
References	171
11 Technology	173
11.1 Stabilization	174
11.2 Molding and Extrusion Technology	176
11.3 Lacquer Resins	180
11.4 Latexes	181
References	183
Subject Index	185
Author Index	193
