

CONTENTS

Chapter 1 HISTORICAL DEVELOPMENT	1
Chapter 2 STRUCTURE OF POLYOLEFINS	6
1. Introduction	6
2. Stereoregularity	10
3. Helical conformation	12
4. Crystallinity	15
Chapter 3 DENSITY AND PROPERTIES	49
1. Introduction	49
2. Density and molecular weight	50
3. Density and tensile strength	55
4. Density and modulus (stiffness)	57
5. Density and elongation	61
6. Density and impact resistance (toughness)	61
7. Density and hardness	63
8. Density and coefficient of expansion	64
9. Density and thermal properties	68
10. Density and permeability	74
11. Density and flow properties	78
Chapter 4 STRUCTURE AND PHYSICAL PROPERTIES	83
1. Properties in tension	83
2. Flexural properties of polyolefins	137
3. Properties in compression	141
4. Properties in shear	143
5. Creep and stress relaxation	145
6. Hardness of polyolefins	155
Chapter 5 STRUCTURE AND CHEMICAL RESISTANCE	160
1. General	160
2. Effect of solvents	160
3. Effect of various chemical agents	169

Chapter 6	STRUCTURE AND ELECTRICAL PROPERTIES	174
1.	Introduction	174
2.	Theoretical	175
3.	Volume resistivity; electrical conductivity	180
4.	Dielectric constant and loss factor	182
5.	Dielectric strength	187
Chapter 7	STRUCTURE AND THERMAL PROPERTIES	189
1.	Specific heat	200
2.	Thermal conductivity	201
3.	Thermal diffusivity	206
4.	Heat transfer	207
5.	Low-temperature properties	212
6.	Structure and melting point	217
7.	Structure and thermal degradation	228
8.	Structure and stabilization	239
Chapter 8	STRUCTURE AND PROCESSING CHARACTERISTICS	248
1.	Structure and rheology	248
2.	Recent advances in polyolefin extrusion	286
