

CONTENTS

POLYMERIZATION

1. Historical Developments	1
2. Ethylene and Higher Alpha-Olefins	11
3. Catalyst Systems	39
4. Stereospecific Polymerization	91
5. Mechanism of Anionic (Low-Pressure) Polymerization	147
6. Mechanism of Polymerization on Transition Metal Oxide Solid Catalysts	215
7. Mechanism of Free-Radical Polymerization of Ethylene	267
8. Polymerization and Copolymerization Processes	301

STRUCTURE

9. Dilute Solution Properties	397
10. Rheological Properties	449
11. Molecular Weight and Molecular Weight Distribution	513
12. Crystalline and Spherulitic Properties	577
13. Relationship between Structure and Fundamental Properties	677
14. Absorbility and Relaxation Spectra of Polyolefins	719
15. Stability and Structure Relationships	819
16. Mechanism of Chemical Effects in Irradiated Polymers	845
Author Index	929
Subject Index	957
Patent Index	999
