

CONTENTS

I.	Introduction	1
II.	Raw Materials	17
I.	Introduction	17
II.	Isocyanates	17
1.	Preparation of Isocyanates	17
2.	Molecular Structure and Spectra	28
3.	Analysis Methods for Isocyanates and Urethanes	29
4.	Handling Precautions	30
III.	Polyethers	32
1.	General	32
2.	Preparation	33
3.	Reactions of Polyether Polyols	
4.	42	
4.	Properties	43
IV.	Polyester	44
1.	General	44
2.	Preparation	45
3.	Reactions	47
V.	Castor Oil and Derivatives	48
1.	Origin and Manufacture	48
2.	Composition and Properties	50
3.	Reaction of Castor Oil and of Ricinoleic Acid	51
4.	Uses	54
III.	The Reactions of Isocyanates and Isocyanate Derivatives	63
I.	Introduction	63
II.	Reaction of Isocyanates	64
1.	Reactions with Compounds Containing the N—H Group	65
2.	Reactions with Compounds Containing the O—H Group	73
3.	Reactions with Compounds Containing the C—H Group	84
4.	Reactions with Compounds Containing the S—H Group	86
5.	Reaction with Miscellaneous Active Hydrogen Compounds	86
6.	Reactions with Unsaturated Compounds	88
7.	Dimerization	91
8.	Trimerization	94
9.	Miscellaneous Reactions	97
10.	Reaction of “Inorganic” Isocyanates	100
11.	Charts of Reactions	103

III. Reactions of Isocyanate Derivatives	103
1. Reactions of Urethanes	103
2. Reactions of Substituted Ureas	111
3. Reactions of Isocyanate Dimers	113
4. Reactions of Isocyanate Trimers	116
5. Reactions of Carbodiimides	116
6. "Splitting" of "Blocked: Isocyanate	118
IV. The Kinetics and Catalysis of the Isocyanate Reactions	129
I. Introduction	129
II. General Considerations	129
III. Reactions with Alcohols	134
1. Reactions of Monoisocyanates	134
2. Reactions of Diisocyanates	150
3. Catalysis of the Isocyanate-Hydroxyl Reaction	161
IV. Reactions with Amines	173
V. Reactions with Water	180
VI. Reactions with Carboxylic Acids	186
VII. Reactions with Phenols	189
VIII. Reactions with Ureas	190
IX. Reactions with Urethanes	194
X. Reactions with Thiols	198
XI. Summary of Relative of Reactions with Active Hydrogen Compounds	204
XII. Summary of Catalytic Effects	208
XIII. Catalysis in the Control of Polymer Formation	211
V. Formation of Urethane Forms	219
I. Introduction	219
II. The Chemistry of Foam Formation and Cure	220
1. Reactions of Isocyanates	220
2. Function of the Isocyanate in Foaming	223
3. Role of Catalysts in Foam Systems	227
4. The Final Cure of Urethane Foam	232
III. Colloid Chemistry of Foam Formation	235
1. Bubble Nucleation	237
2. Bubble Stability	241
3. Urethane Foam Systems	245
IV. Viscoelastic Changes in Foaming	249
1. Effect on Cell Structure, Voids and Foam Collapse	249
2. Relations between Cell Structure and Properties	255
3. Structure Factors Affecting Stress Relaxation and Creep in Flexible Foams	259

VI. The Relationships between Polymer Structure and Properties in Urethanes	261
I. Introduction	261
II. General Considerations	262
1. Molecular Weight	262
2. Intermolecular Forces	262
3. Stiffness of Chain Units	263
4. Crystallization	263
5. Ease of Rotation of Chain Segments	264
6. Cross Linking	264
7. Theory of Rubber Elasticity	267
III. The Influence of Component Group Structures in Urethanes	269
IV. Urethane Elastomers	273
1. Polyester-Urethane Elastomers	276
2. Polyether-Urethane Elastomers	293
V. Urethane Foams	314
1. Polyether-Urethane Foams	316
2. Polyester-Urethane Foams	323
VI. Urethane Coatings	323
VII. Other Urethane Polymer Applications	326
VIII. Flow Creep, and Stress Relaxation in Urethane Polymers	327
1. Factors Related to Primary Chemical Bonds	328
2. Factors Related to Secondary Bonds	329
3. Compression Set	331
4. Softening of Urethane Polymers during Flexing	335
IX. Summary of Structure-Property Relations in Urethanes	337
X. Conclusions	343
Appendix A. Commercially Available Isocyanates	347
Appendix B. Commercially Available Polyethers	349
Appendix C. Commercially Available Polyesters	351
Appendix D. Trade Names and Generic Names	352
Index	355
