

CONTENTS

Introduction	v
Chapter I. SYNTHESIS AND TRANSFORMATIONS OF POLYIMIDES	1
Preparation of polyimides by polycondensation in the melt	2
Two-step preparation of aromatic polyimides	4
Individual aromatic polyimides obtained by the two-step method	13
Preparation of polyimides from dihalides and aromatic diimides	20
Some new nitrogen-containing polymers based in amines and dianhydrides	22
Imidization kinetics and secondary chemical transformations of polyimides	24
Chapter II. THERMAL AND CHEMICAL STABILITY OF POLYIMIDES	37
Thermal degradation of polypyromellitimides in an inert medium	37
Thermooxidative degradation of polypyromellitimides	45
Effect of chemical structure of polyimides on their thermal and thermooxidative stability	51
Chemical stability of polyimides	65
Chapter III. PHYSICAL PROPERTIES OF POLYIMIDES OF DIFFERENT CHEMICAL STRUCTURES	71
Common properties and characteristic differences of polyimides	71
Classification of aromatic polyimides according to their physical and mechanical properties and structure	80
Secondary transformations and physical properties	84
Effect of chemical structure on the physical properties of polyimides belonging to different groups	92
Copolyimides	106
Orientation stretching and crystallizability of polyimides	108
Certain optical properties of aromatic polyimides	113
Chapter IV. PRACTICAL UTILIZATION OF POLYIMIDES	119
Polyimide films	119
Polyimide bulk plastics	126
Polyimide varnishes and adhesives	135
Polyimide fibers	139
Bibliography	142
APPENDIX I Patents and Certificates of Authorship on the Subject of Polyimides	147
APPENDIX II. Reagents Employed in Polyimide Synthesis	152
APPENDIX III. Infrared Absorption Spectra of a Number of Polyimides	154
