

CONTENTS

I. Introduction	1
II. Polymers from Aldehydes and Other Carbonyl Compounds	9
I. Introduction	9
II. Cyclic Polymers of Aldehydes	11
III. Linear Polymers of Aldehydes	21
IV. Polymers of Other Carbonyl Compounds	68
V. Projection	75
III. Polymers from 1,2-Epoxides: I. Chemistry	83
I. Introduction	83
II. Monomer Synthesis and properties	84
III. Preparation of Polymers	102
IV. Polymers from 1,2-Epoxides: II Applications and Technology	169
I. Introduction	169
II. Production Alkylene Oxide Polymers	170
III. Polymers from Ethylene Oxide	173
IV. Polymers from Propylene Oxide	221
V. Copolymers of Ethylene and Propylene Oxides	231
VI. Polymers of Other 1,2-Epoxides	237
VII. Applications of Ethylene Oxide Adducts and Polyethylene Oxides	239
V. Polymers from 1,3- and High Epoxides	293
I. Introduction	293
II. Monomer Syntheses and Analysis	294
III. Thermodynamics of the Polymerization Reaction	297
IV. Kinetics and Mechanism of the Polymerization Reaction	298
V. Preparation of Polymers	301
VI. Properties of the Polymers	304
VI. Polyurethanes from Polyalkylene Oxides	315
I. Introduction	315
II. Raw Materials	317
III. Chemistry	323
IV. Kinetics	327

V. Flexible Foams	333
VI. Rigid Foams	357
VII. Physical Tests for Urethane Foams	369
VIII. Urethane Elastomers	372
IX. Coatings	385
X. Adhesives	398
VII. Polyacetals and Other Polyethers	409
I. Introduction	409
II. Reaction Between Polyols and Carbonyl Compounds and / or Acyclic Acetals	409
III. Addition of Polyols to Carbon-Carbon Double Bonds	419
IV. Ring Opening of Cyclic Acetals	425
V. Dehydration of Polyols	430
VI. Condensation by Dehydrohalogenation	433
VII. Miscellaneous Syntheses	438
VIII. Poly (Ester-Acetals)	442
IX. Poly (Amide-Acetals)	446
Author Index	455
Subject Index	479
List of Trademarks	489
