

CONTENTS

Chapter 1. STRUCTURE AND THERMAL STABILITY OF POLYMERS	1
Stability of Polymers to Destructive Agents	1
Preparation and Structure of Polymers	15
Chemical Transformations of Synthetic Polymers	18
Products Formed in the Thermal Decomposition of Polymers	21
Decrease of the Molecular Weight of Macromolecules and Formation of Monomers	29
Effect of structural irregularities in polymers in their resistance to heat	34
Thermal decomposition of polymers of different molecular weights	37
The function of end groups in the decomposition of polymers	39
Decomposition of Branched and Reticulate Polymers	39
Mechanism of Heat Decomposition in Polymers	43
Chapter 2. OXIDATION OF POLYMERS IN THE DARK AND UNDER ILLUMINATION	57
Decomposition of polymers Under the Influence of Oxygen (Thermooxidative Degradation)	57
Photooxidation and Photodecomposition of Polymers	70
Chapter 3. INHIBITION OF POLYMER DECOMPOSITION DUE TO OXIDANTS, HEAT AND LIGHT	82
Stabilization of Polymers to Thermooxidative Degradation	83
Stabilization of Polymers to Non-Oxidative Thermal Decomposition	99
Stabilization of Polymers to Sunlight	100
Evaluating the Effect of Stabilizers in Polymers	107
Chapter 4. STABILIZATION OF HYDROCARBON POLYMERS	118
Polyethylene	118
Thermooxidative degradation of polyethylene	119
Photooxidation of Polyethylene	122
Stabilization of polyethylene to thermooxidative degradation	124
Photostabilization of polyethylene	131
Polypropylene	134
Polystyrene	138

Chapter 5. STABILIZATION OF POLY(VINYL CHLORIDE)	142
Decomposition of Poly(Vinyl Chloride) by Heat and Light	142
HCl Acceptors Serving as Stabilizers of Poly(Vinyl Chloride)	158
Stabilizers of Poly(Vinyl Chloride) Other Than HCl Acceptors	162
Some Stabilizing Systems Used in Industrial Practice	166
BIBLIOGRAPHY	187
INDEX	201
