

CONTENTS

**PART I. THEORIES OF POLYMER FORMATION**

- |                                  |    |
|----------------------------------|----|
| 1. Introduction and Statistics   | 1  |
| 2. Principles of Resin Formation | 24 |

**PART II. CONDENSATION POLYMERS**

- |  |    |
|--|----|
| 3. Phenol Aldehyde Resins, with A. S. HUSSEY | 53 |
| 4. Urea and Melamine Formaldehyde Resins     | 80 |
| 5. Polyesters and Polyamides                 | 97 |

**PART III. VINYL POLYMERS**

- |  |     |
|--|-----|
| 6. Polyvinyl Acetate Resins                              | 115 |
| 7. Polyvinyl Chloride and Polyvinylidene Chloride Resins | 129 |
| 8. Acrylate and Methacrylate Resins                      | 144 |
| 9. Polystyrene   | 158 |
| 10. Hydrocarbon Resins                                   | 166 |

**PART IV. SYNTHETIC RUBBERS**

- |   |     |
|---|-----|
| 11. Polychloroprene, Polybutadiene, Polysulfide, and Polybutene Rubbers | 174 |
|---|-----|

**PART V. RESINS FROM NATURAL PRODUCTS**

- |                                       |     |
|---------------------------------------|-----|
| 12. Cellulose Nitrate                 | 231 |
| 13. Cellulose Esters of Organic Acids | 242 |
| 14. Cellulose Ethers                  | 254 |
| 15. Resins from Rubber                | 262 |

**PART VI. APPLICATION OF SYNTHETIC RESINS**

- |  |     |
|--|-----|
| 16. Solvents and Plasticizers for Synthetic Resins | 268 |
| 17. Application of Synthetic Resins as Plastics    | 274 |
| 18. Use of Synthetic Resins in Protective Coatings | 284 |

- |       |     |
|-------|-----|
| INDEX | 293 |
