

CONTENTS

Preface	4
1. A General Overview of Polymer Foams	4
1.1 Background	4
1.2 Structural Features of Polymeric Foams	4
1.3 Voids	6
2. Foam Generation	6
3. Chemical Blowing Agents	7
3.1 Materials	7
3.2 Incorporation	8
3.3 Structure and Decomposition Products of CBAs	8
3.4 CBA Selection	9
4. Physical Blowing Agents	10
4.1 Background to the CFC Problem	10
4.2 The Montreal Agreement	12
4.3 Substitutes for CFCs	13
5. Manufacture of Thermosetting Foams	14
5.1 Mixing and Dispensing Equipment	14
5.2 Continuous Processes	15
5.3 Discontinuous Processes	16
6. Manufacture of Thermoplastics Foams	20
6.1 General Observations	20
6.2 Continuous Processes	21
6.3 Batch Processes	23
7. Properties of Polymer Foams	26
7.1 Mechanical Properties	26
7.2 Thermal Properties	29
7.3 Combustion	29

8. Markets and New Applications	31
8.1 Polyurethanes	31
8.2 Thermoplastics	32
9. Additional References	33
References and Abstracts	35
Index	103
