Chapter 1 Introduction	1
References.....	2
Chapter 2 Historical Developments of Polyurethane and Polyisocyanurate Foams	5
2.1 Introduction	5
2.2 Isocyanate-Based Foams	5
2.3 Polyurethane (PUR) Foams	6
2.4 Physical Blowing Agents	7
2.5 Third Generation Blowing Agents.....	8
2.6 Fire Hazards.....	8
2.7 Polyisocyanurate (PIR) Foams.....	8
2.8 Frothing Technology.....	9
2.9 Phosgene-Free, Isocyanate Production Methods.....	9
2.10 Recycling	9
References.....	9
Chapter 3 Fundamentals.....	11
3.1 Introduction	11
3.2 Isocyanate Chemistry	11
3.2.1 Addition Reaction	11
3.2.2 Dimerization	12
3.2.3 Condensation Reaction.....	13
3.2.4 Cyclotrimerization Reaction.....	13
3.2.5 Radical Polymerization	13
3.2.6 Thermal Dissociation of Addition Compounds.....	13
3.3 Raw Materials.....	14
3.3.1 Polyisocyanates.....	14
3.3.2 Polyols.....	18
3.3.2.1 Conventional Polyether Polyols.....	19
3.3.2.2 Polyester Polyols.....	22
3.3.2.3 Other Types of Polyols	23
3.3.3 Blowing Agents	24
3.3.3.1 Chemical Blowing Agents.....	24
3.3.3.2 Physical Blowing Agents.....	27

3.3.4	Catalysts.....	34
3.3.5	Surfactants.....	40
3.3.6	Chain Extenders and Crosslinkers.....	43
3.3.7	Epoxides.....	43
3.3.8	Flame Retardants.....	43
3.3.8.1	Example A: Liquid Flame Retardants.....	45
3.3.8.2	Example B: Powder Flame Retardants.....	45
3.8.8.3	Example C: Reactive Flame Retardants.....	45
3.8.8.4	Example D: Radical Scavenger Flame Retardants.....	45
3.8.8.5	Example E: Char-Forming Flame Retardants.....	45
3.8.8.6	Example F: Noncalorific Additives.....	46
3.8.8.7	Example G: Incorporation of Thermally Stable Linkages.....	46
3.3.9	Antioxidants.....	46
3.3.10	Colorants.....	47
3.3.11	Mold Release Agents.....	47
3.4	Foam Preparation Technologies.....	47
3.4.1	Foaming Systems.....	48
3.4.2	Foaming Processes.....	48
3.4.2.1	Cup Foaming.....	49
3.4.2.2	Small-Box Foaming.....	51
3.4.2.3	Machine Foaming.....	51
3.5	Chemical Calculations.....	56
	References.....	58
Chapter 4 Polyurethane Foams.....		65
4.1	Introduction.....	65
4.2	Flexible Polyurethane Foams.....	67
4.2.1	Slabstock Foam.....	68
4.2.1.1	Slabstock Foam Process.....	69
4.2.1.2	Polyether Slabstock Foam.....	71
4.2.2	Molded Flexible Foams.....	74
4.2.2.1	Hot-Molded, Flexible Urethane Foam.....	75
4.2.2.2	Cold-Molded, Flexible Urethane Foam.....	75
4.2.2.3	High Resilience (HR) Foams.....	75
4.2.2.4	Viscoelastic Foam.....	77
4.2.2.5	Soft/Super-Soft Slabstock Foam.....	78
4.2.2.6	Semiflexible Slabstock Foam.....	78
4.2.2.7	Reticulated Foam.....	79
4.2.2.8	Integral Skin, Flexible Foam.....	79
4.2.2.9	Microcellular Elastomer.....	81
4.2.2.10	Shoe Sole Foam.....	82
4.3	Rigid Polyurethane Foams.....	82
4.3.1	Introduction.....	82
4.3.2	Production of Rigid Urethane Foam.....	82

4.3.2.1	Slabstock Rigid Foam.....	82
4.3.2.2	Laminates.....	84
4.3.2.3	Sandwich Panels.....	84
4.3.2.4	Appliances.....	85
4.3.2.5	Refrigerated Trucks.....	86
4.3.2.6	Refrigerated Showcases.....	86
4.3.2.7	Vacuum Insulation Panels.....	86
4.3.2.8	Molded, High-Density, Rigid Foams.....	87
4.3.3	On-Site Foaming.....	87
4.3.3.1	Spraying.....	87
4.3.3.2	Frothing-in-Place.....	88
4.3.3.3	Storage-Stable, Two-Component, One-Package Systems.....	88
4.3.3.4	One-Component, Moisture-Cure Systems.....	91
4.3.3.5	Foam Composites.....	91
4.3.3.6	Cryogenic Insulation.....	94
	References.....	96

Chapter 5	Polyisocyanurate Foams	101
5.1	Introduction.....	101
5.2	Methods of Preparing Modified Polyisocyanurate Foams.....	103
5.2.1	Urethane-Modified Polyisocyanurate Foams.....	104
5.2.1.1	Polyether-Polyol Modified Polyisocyanurate Foams.....	104
5.2.1.2	Glycol-Modified-Polyisocyanurate Foams.....	109
5.2.1.3	Aromatic Polyol-Modified Polyisocyanurate Foams.....	110
5.2.1.4	Resole Resin-Modified Polyisocyanurate Foams.....	110
5.2.1.5	Furan Resin-Modified Polyisocyanurate Foams.....	111
5.2.1.6	Isocyanurate-Modified Urethane Foams.....	111
5.2.2	Blowing Agents for Polyisocyanurate (PIR) Foams.....	111
5.2.2.1	All-Water-Blown Polyisocyanurate Foams.....	111
5.2.2.2	C ₅ -Hydrocarbon (HCs)-Blown Polyisocyanurate Foams.....	112
5.2.2.3	HFC-Blown Polyisocyanurate Foams.....	112
5.2.2.4	Blends of Third Generation Blowing Agent-Blown Polyisocyanurate Foams.....	113
5.2.2.5	Halogen-Free, Zero-ODP Azeotrope-Blown Polyisocyanurate Foams.....	113
5.2.2.6	Blend of C ₅ -hydrocarbon HC- and Methylene Chloride-Blown Polyisocyanurate Foams.....	113

5.2.3	Polyisocyanurate Foams Modified by non-Urethane Linkages.....	113
5.2.3.1	2-Oxazolidone-Modified Polyisocyanurate Foams.....	113
5.2.3.2	Amide-Modified Polyisocyanurate Foams.....	116
5.2.3.3	Imide-Modified Polyisocyanurate Foams.....	117
5.2.3.4	Carbodiimide-Modified Polyisocyanurate Foams.....	118
5.2.3.5	Secondary Aromatic Diamine-Modified Polyisocyanurate Foams.....	119
5.3	Chemistry of Cyclotrimerization.....	120
5.3.1	Kinetics and Mechanism of Cyclotrimerization.....	120
5.3.2	Relative Catalytic Activity Studies in Nonsolvent Systems.....	124
5.4	Properties of Polyisocyanurate Foams.....	128
5.4.1	Flammability.....	128
5.4.2	Flame and Heat Resistance.....	129
5.4.3	Smoke Suppression.....	131
5.4.3.1	Smoke Scavenger Method.....	131
5.4.3.2	Smoke Suppression by Silicon-Containing Compounds.....	132
5.4.4	HCN Generation.....	133
5.4.4.1	Effect of Atmospheric Gas on HCN Generation.....	134
5.4.4.2	Effect of Temperature on HCN Generation.....	134
5.4.4.3	HCN Generated from Various Polymeric Foams.....	135
5.4.4.4	HCN Generation vs. Percent Nitrogen in Foams.....	135
5.4.4.5	HCN from Nitrogen-Containing Polymers.....	135
5.5	Applications of Polyisocyanurate Foam.....	136
5.5.1	Seamless Insulation for Petrochemical Tanks and Pipelines.....	137
5.5.2	Wall Panels.....	138
5.5.3	Residential Wall Sidings.....	138
5.5.4	Cryogenic Applications.....	138
5.5.5	Gashol Tank Floats.....	139
	References.....	139
	Appendix.....	143
A.1	Analyses.....	143
A.1.1	Analyses of Raw Materials.....	143
A.1.2	Analyses of Foams.....	143
A.1.3	Isocyanates in Air.....	143

A.2 Testing Methods of Foams	143
A.2.1 Flexible Urethane Foams: Physical Properties	143
A.2.2 Flexible Foams: Flammability	144
A.2.3 Microcellular Foams	144
A.2.4 Rigid Urethane Foams: Physical Properties	144
A.2.5 Rigid Foams: Flammability	145
A.2.6 Rigid Foams: Electrical Properties	145
A.3 Unit Conversion	146
Index	147
