
Table of Contents

Chapter 1	Introduction to Polymeric Foams	1
1.1	Basic Considerations on Foams, Foaming, and Foamed Polymers	1
1.2	History of Polymeric Foams	6
1.3	Foam Structure and Properties	8
1.4	Blowing Agents	10
1.5	Environmental Issues and Technical Challenges	13
1.6	Thermoplastic and Thermoset	15
1.7	Polymeric Foam Technology	18
1.8	Applications and Usage	20
Chapter 2	Thermodynamics and Kinetics	23
2.1	Equilibrium	23
2.2	Super-Saturation	27
2.3	Reactions and their Kinetics	28
2.4	Melt/Gas Rheology	32
2.5	Crystallization Kinetics	35
2.6	Transport Phenomena: Diffusion and Permeation	38
Chapter 3	Foaming Fundamentals	41
3.1	Physical Blowing Agents	41
3.2	Chemical Blowing Agents	43
3.3	Reactive Foaming	46
3.4	Emulsion: Chemical Solution	49
3.5	Nucleation in Batch, Continuous, and Reaction Foaming	52
3.5.1	Nucleation in Batch Foaming Processes	54
3.5.2	Nucleation in Continuous Foaming Processes	56
3.5.3	Nucleation in Reaction Foaming Processes	59
3.6	Growth	60
3.7	Cell Coalescence and Rupture	64
3.8	Solidification and Curing	67
Chapter 4	General Foam Processing Technologies	73
4.1	Foam Extrusion	73
4.2	Thermoset Reactive Foaming	78
4.3	Foam Injection Molding	80
4.4	X-Linked Polyolefin Foam	86
4.5	Molded Bead	88

4.6	Foamed Film.....	89
4.7	Areogel.....	91

Chapter 5 Relationships Between Foam

	Structure and Properties	93
5.1	Effects of Foam Density.....	93
5.2	Open Cell Content and Its Effects	97
5.3	Key Properties: Energy Absorption, Insulation, Sound Absorption, and Mechanical Properties	99
5.4	Cell Size Distribution and Its Effects	105
5.5	Dimensional Stability.....	108
5.6	Residual Blowing Agent.....	112
5.7	X-Linked Content	114

Chapter 6 General Polymeric Foams and Their Applications ... 117

6.1	Flexible and Rigid Polyurethane (PU) Foams	117
6.2	Polystyrene Foams: Sheet and Slab.....	121
6.3	Polyolefin Foams: PE, PP and Blends.....	124
6.4	Other Foams	128

Chapter 7 Wood Composite Foams..... 131

7.1	Introduction.....	131
	7.1.1 Outline	131
	7.1.2 Polymeric Composites.....	131
	7.1.3 Fillers in Polymeric Composites	132
	7.1.3.1 Mineral Fillers	132
	7.1.3.2 Organic Fillers.....	132
	7.1.4 Microstructure of Wood Fibers.....	133
	7.1.5 Materials Used for Wood-Fiber/Plastic Composites	134
	7.1.6 Advantages of Wood-Fiber/Plastic Composite Foams	135
7.2	Challenges to and Processing Strategies for the Development of WPC Foams	136
	7.2.1 Dispersion of Wood-Fiber and Fiber-Matrix Bonding	136
	7.2.2 Processing Difficulties Due to Increased Viscosity.....	136
	7.2.3 Volatile Emissions Released from Wood-Fiber and Corresponding TGA Studies	137
	7.2.4 Critical Processing Temperatures in the Extrusion Foaming of WPC.....	138
	7.2.5 Control of Residence Time in the Extrusion Foaming of WPC.....	139
7.3	WPC Foams in Batch Processing.....	141
7.4	Foaming of WPCs with Chemical Blowing Agents in Extrusion.....	142
	7.4.1 Chemical Blowing Agents (CBAs)	142
	7.4.2 WPC Extrusion Systems.....	144
	7.4.3 Two-Stage Extrusion Foaming of WPC with CBAs.....	145

7.4.4	Expansion Behavior of WPC Foams Blown with CBAs.....	145
7.4.5	Cell Morphology of Extruded WPC Foams Blown with CBAs.....	147
7.5	Foaming of WPCs with Physical Blowing Agents (PBAs) in Extrusion	147
7.6	WPC Foams in Injection Molding	147
7.7	Innovative Stretching Technology and WPC Foams.....	148
7.7.1	Introduction.....	148
7.7.2	Experimental Setup and Procedure for Stretched WPCs.....	149
7.7.2.1	Melt-Blending of WPCs.....	149
7.7.2.2	Extrusion and Sizing	151
7.7.2.3	Stretched WPC Processing	151
7.7.3	Effects of Preheating Time and Oven Temperature on Stretched WPCs.....	151
7.7.4	Tensile Properties of Stretched WPCs.....	153
7.7.5	Morphology of Stretched WPCs.....	154
7.7.6	Effects of Coupling Agents on the Properties of Stretched WPCs.....	155
7.8	Effects of Nano-Clay on WPC Foams and Their Flame Retardancy.....	157
7.8.1	Introduction.....	157
7.8.2	Preparation of Polymer Nano-Composites with a Twin-Screw Compounder	157
7.8.3	Effects of Nano-Clay on the Expansion Behavior of WPC Foams.....	158
7.8.4	Effects of Nano-Clay on the Cell Morphology of WPC Foams.....	158
7.8.5	Effects of Nano-Clay on the Flame Retardancy of WPCs.....	160
7.8.6	Effects of the Degree of Exfoliation of Nano-Clay on the Flame Retardancy of WPCs.....	161
7.9	Current Foaming Technology and Markets for WPC	163
7.10	Summary	164

Chapter 8 Biodegradable Foams 165

8.1	Introduction	165
8.1.1	Importance of Biodegradable Plastics and Foams	166
8.2	Definition of Biodegradability	168
8.3	Biodegradable Polymers.....	168
8.4	Advantages and Disadvantages.....	169
8.5	Degradation Mechanisms.....	169
8.6	Development of Biodegradable Foams.....	169
8.7	Extrusion of Novel Water Soluble PVOH Foams	171
8.7.1	Polyvinyl Alcohol (PVOH) Resin Chemistry and Rheology.....	171

8.7.1.1	PVOH Chemistry	171
8.7.1.2	Manufacture of PVOH.....	171
8.7.1.3	Vinex PVOH Thermoplastic Copolymer Resins.....	172
8.7.1.4	PVOH Resin Rheology.....	172
8.7.2	Experiments.....	174
8.7.3	Computer Model.....	175
8.7.4	Results and Discussion.....	178
8.7.4.1	Effect of Cross-Linking Agent	178
8.7.4.2	Effect of Blowing Agent Concentration	179
8.7.5	Conclusions	179
8.8	Starch Foams	180
8.8.1	Chemistry of Starch	181
8.8.2	Types of Starches	181
8.8.3	Extrusion of Starch Foams.....	182
8.8.4	Starch Foam Compositions.....	182
8.8.5	Experimental Results and Discussion.....	185
8.8.5.1	High Amylose and Hydroxypropylated ¹ Starch Blend Foam.....	185
8.8.5.2	Native Starch and High Amylose Starch Blend Foam	185
8.8.5.3	High Amylose Starch Blend Foam.....	186
8.8.6	Key Observations	186
8.8.7	Comparison of Starch Foam vs. PS Foam.....	186
8.9	Poly(lactic Acid (PLA) Polymer	188
8.9.1	Chemistry of Poly(lactic Acid (PLA) Polyesters	189
8.9.2	PLA Foam.....	190
8.9.3	PLA Cellular Structure through Solution Process — Another Method	191
8.10	Future Work.....	191
8.11	Nomenclature	192
	References.....	193
	Author Index.....	205
	Subject Index	209
