

CONTENTS

Chapter 1. Introduction	1
I. General	1
II. Historical Development of Foams	2
III. Recent Trends in Processing of Cellular materials	7
IV. Present and Future Marketing Trends	13
Chapter 2. The Mechanism of Foam Formation	23
I. Introduction	23
II. Colloidal Aspects of Foam Formation, Utilizing Bowing Agents	25
III. Precipitation Foams	60
IV. Application of Basic Principles to Specific Foam Systems	64
Chapter 3. Flexible Polyurethane Foams	109
I. Introduction	110
II. Chemistry and Raw Materials Used in Flexible Foams	112
III. Flexible Urethane Foam Processes	145
IV. Polymer Structure and Properties in Flexible and Semi-flexible Foams	191
V. Applications of Flexible Urethane Foams	212
Chapter 4. Sponge Rubber and Latex Foam	227
I. Introduction	227
II. Sponge Rubber	229
III. Sulfur Vulcanized Latex Foam	239
IV. Carboxylated Latex Foam	253
V. Comparison of Cellular Rubber Products	260
Chapter 5. Polyolefin Foams	271
I. Introduction	271
II. Raw Materials	273
III. Processes	281
IV. Properties	292
V. Relationship Between Structure and Properties	295
VI. Applications	301

Chapter 6. Polyvinyl Chloride Foams	305
I. Introduction	306
II. Chemically of Vinyl Plastics	323
III. Plastisol Foam Laminate Production	345
IV. Calendered, Extruded, and Injection-Molded Foam	356
V. Mechanically Blown Foam	367
VI. Pressure-Molded Foam	373
VII. Vinyl Foam Markets and Future	380
Chapter 7. Silicone Foams	385
I. Introduction	385
II. Silicone Resin Foams	386
III. Silicone Rubber Foams	391
IV. Syntactic Silicone Foams	395
Chapter 8. Testing of Cellular Materials	397
I. Introduction	398
II. Sample Selection and Conditioning	408
III. Definitions	409
IV. Cellular Structure	410
V. Mechanical Properties	414
VI. Acoustical Properties (Sound Absorption)	435
VII. Electrical Properties	436
VIII. Permanence Properties	436
IX. Flammability	440
X. Thermal Properties	441
XI. Specifications	444
XII. Summary	445
