

CONTENTS

1	Polymer Structure and Physical Properties	1
2	Stress Strain Behavior of Plastics Materials	27
3	Effects of Fillers on Properties and Performance	43
4	Stress Analysis for Plastics	59
5	Structural Design of Beams, Plates and Other Structural Members	71
6	Dynamic Load Response of Plastics Members and Effects of Cyclical Loading	90
7	Other Forms of Stress Applied Plastics Parts	102
8	Design for Stiffness	124
9	Processing Limitations on Plastics Product Design	147
10	Material and Process Interaction and the Effects on the Performance of Plastics Parts and the Resulting Design Limitations	192
11	Performance in Service Environmental Exposure	209
12	Design Procedure for Plastics Parts: Function, Material, Geometry, Test	224
13	Design of Plastics Structural Parts for Static Loads	232
14	Design of Dynamically Loaded Plastics Parts and Evaluation Procedures	254
15	The Design of Plastics Parts for Electrical Applications	275
16	Design of Plastics Parts for Optical Applications	298
17	Other Design Applications for Plastics	317
	Index	329
