

CONTENTS

Polymer Blends and Alloys: Expanding opportunities for Plastics	1
Mechanical properties and Permeability of Polypropylene and Polyethylene Terephthalate Mixtures	12
Analysis of Polymer Blends by Rheological Techniques	17
The Application of Isophthalic Unsaturated Polyester Urethane Hybrids in Conventional Molding Techniques	25
Silicone Elastomer Polyester Alloy – New Polyesters Formed from Two Thermoset Systems	39
Thermoplastic Polyurethanes/ABS Blends: Properties and Applications	49
Structure and Property of the Hybrid Copolymer: PMMA/Inorganic Silica	58
Effect of Charge Groups on Incompatible Polymer Systems	68
Improving Polyolefin properties with Butyl	87
Design of Alloys of PVC with NBR Copolymers to Produce Thermoplastic Elastomers	101
Sulfonate Ionomer Blends and Complexes	131
Modification of (ABS) Properties by Additions of Polycarbonate (PC) and Nylon 6	154
Properties and Morphology of Thermotropic Polyester/Nylon 12 Blends	175
