

CONTENTS

Practical Benefits of Polymer Blending	1
Transmission Electron Microscopy of Polymer Blends	24
Properties of Poly (Vinyl Chloride) Modified with Ethylene Propylene Terpolymer and Coupling Agent	37
Freeze-Drying for Morphological Control of High Performance Semi-Interpenetrating Polymer Networks, Part 4	59
Effect of Mixing Conditions on Properties of Poly (Bisphenol-A-Carbonate) /Poly (Butylene Terephthalate) Blends	73
Acid Containing Styrenic Polymers and Polycarbonate Alloys	92
Allylnadic-Imide/Biscyanate Blends	101
Allylnadic-Imide/Bismaleimide Blends	110
Use of the particular Rheological Composition Concept for the Development of Industrial LDPE/PS Blends	117
Mechanical Properties and Weathering Behavior of Linear Low Density Polyethylene/Low Density Polyethylene Blends for Agricultural Applications	132
Equipment Requirements for Continuous Polymerizations in Extruders	145
Index	157
