CHAPTER 1. Combinatorial Methods for the High-Throughput Characterization and Screening of Biodegradable Polymers

Jon B. Thorstenson, Balaji Narasimhan

| | |
|--|----|
| 1. Introduction | 1 |
| 2. The Combinatorial Method | 3 |
| 2.1. Experimental Design | 3 |
| 2.2. Synthesis of Libraries | 4 |
| 2.3. High-Throughput Characterization and Screening | 5 |
| 2.4. Informatics and Validation | 5 |
| 2.5. Benefits and Challenges of the Combinatorial Approach | 6 |
| 3. Combinatorial Methods for Biodegradable Polymers | 6 |
| 4. Summary and Outlook | 9 |
| References | 10 |

CHAPTER 2. Natural Origin Degradable Polymers in Biomedical Applications

*H. S. Azevedo, M. E. Gomes, P. B. Malafaya, A. P. Marques,
A. J. Salgado, R. L. Reis*

| | |
|---|----|
| 1. Introduction | 13 |
| 2. Tissue Engineering Using Starch-Based Scaffolds Obtained by Different Processing Methodologies | 14 |
| 3. Tissue Engineering of Bone | 17 |
| 4. Controlled Release Systems—Natural-Based Polymers | 18 |
| 5. Biodegradation of Natural Polymers, their Blends, and Composites | 21 |
| 6. Methodologies and Surface Treatments to Induce the Bioactivity of Biodegradable Polymers | 25 |
| 7. <i>In Vitro</i> Studies of the Biocompatibility of Starch-Based Polymers | 27 |
| 8. <i>In Vivo</i> Studies | 29 |
| References | 29 |

CHAPTER 3. Use of Biodegradable Polymers in Oral Drug Delivery: Challenges and Opportunities

Rebecca L. Carrier, Kenneth C. Waterman

| | |
|---|----|
| 1. Introduction | 34 |
| 2. Motivation for Use of Biodegradable Polymers in Oral Drug Delivery | 34 |
| 2.1. Oral Drug Delivery | 34 |
| 2.2. Modes of Drug Delivery Frequently Utilizing Biodegradable Polymers | 35 |
| 2.3. Advantages and Disadvantages of Biodegradable Polymers in Oral Drug Delivery | 35 |

| | | |
|------|---|----|
| 3. | The Gastrointestinal Tract as a Drug Delivery Site..... | 37 |
| 3.1. | Oral Cavity..... | 37 |
| 3.2. | Stomach..... | 37 |
| 3.3. | Intestinal Epithelium..... | 38 |
| 3.4. | Colon..... | 39 |
| 4. | Classes of Oral Drug Delivery Devices Most Often Incorporating Biodegradable Polymers.... | 39 |
| 4.1. | Bioadhesive Systems..... | 40 |
| 4.2. | Particles Taken Up by the Intestinal Mucosa..... | 41 |
| 4.3. | Site-Specific Delivery..... | 42 |
| 4.4. | General Controlled Release..... | 43 |
| 5. | Specific Biodegradable Polymers Frequently Utilized for Oral Administration..... | 43 |
| 5.1. | Natural Polymers..... | 43 |
| 5.2. | Synthetic Polymers..... | 45 |
| 6. | Testing Performance..... | 48 |
| 6.1. | Release and Biodegradation..... | 48 |
| 6.2. | Bioadhesion..... | 49 |
| 6.3. | Particulate Uptake..... | 51 |
| 6.4. | Site Specificity..... | 51 |
| 7. | Clinical Use of Orally Administered Biodegradable Polymers..... | 52 |
| 8. | Future Directions..... | 53 |
| | References..... | 54 |

CHAPTER 4. Thermoplastic Starch as a Biodegradable Matrix for Encapsulation and Controlled Release

Gülden Yilmaz, Remy O. J. Jongboom, Cees van Dijk

| | | |
|------|--|----|
| 1. | Introduction..... | 58 |
| 1.1. | Encapsulation and Controlled Release..... | 58 |
| 1.2. | Starch..... | 59 |
| 2. | Thermoplastic Starch as Matrix Material..... | 62 |
| 2.1. | Starch as Matrix Material for Encapsulation..... | 62 |
| 2.2. | Extrusion as Processing Technology..... | 63 |
| 3. | Applications of Thermoplastic Starch as Matrix Material..... | 66 |
| 3.1. | Food Industry..... | 66 |
| 3.2. | Agriculture..... | 67 |
| 3.3. | Pharmaceuticals..... | 68 |
| 4. | Patent Literature..... | 69 |
| 4.1. | Non-Continuous Processes..... | 69 |
| 4.2. | Continuous Processes..... | 70 |
| 5. | Concluding Remarks..... | 73 |
| | References..... | 74 |

CHAPTER 5. Daily to Annual Biodegradable Drug Delivery Strategies for Psychoactive Compounds

*Meredith L. Hans, Nily Dan, Anthony M. Lowman,
Karen I. Winey, Steven J. Siegel*

| | | |
|------|--|----|
| 1. | Introduction..... | 78 |
| 1.1. | Medication Adherence and Mental Illness..... | 78 |
| 1.2. | Efforts to Improve Drug Adherence..... | 78 |
| 2. | Biodegradable Polymers..... | 80 |
| 2.1. | Types of Biodegradable Polymers..... | 80 |
| 2.2. | Drug Release Mechanisms..... | 83 |

| | |
|------------------------------------|----|
| 3. Drug Delivery Systems | 86 |
| 3.1. Microparticles | 87 |
| 3.2. Implants | 91 |
| 3.3. Nanoscale Drug Delivery | 95 |
| 3.4. Prodrugs | 97 |
| 4. Summary | 98 |
| References | 99 |

CHAPTER 6. Biodegradable Materials for Nonviral DNA Delivery

Tatiana Segura, Brian C. Anderson, Lonnie D. Shea

| | |
|--|-----|
| 1. Introduction | 104 |
| 2. Complexation Agents | 105 |
| 2.1. PEG Containing Polymers | 105 |
| 2.2. Poly(amino acids) | 107 |
| 2.3. Poly(amino acid esters) | 109 |
| 2.4. Poly(amino esters) | 110 |
| 2.5. Polyphosphazenes | 111 |
| 2.6. Polyphosphoesters | 112 |
| 3. Amphiphilic Copolymers | 113 |
| 3.1. Synthesis and Characterization | 113 |
| 3.2. <i>In Vitro</i> Uptake and Transgene Expression | 114 |
| 4. DNA Nanoparticles | 114 |
| 4.1. Nanoparticle Formation and DNA Encapsulation | 115 |
| 4.2. Characteristics of the Nanoparticles | 115 |
| 4.3. <i>In Vitro</i> DNA Uptake and Transgene Expression | 115 |
| 4.4. <i>In Vivo</i> DNA Uptake and Transgene Expression | 116 |
| 5. Microspheres for DNA Delivery | 116 |
| 5.1. Synthetic Polymer Microspheres | 117 |
| 5.2. Injectable Collagen Pellets | 117 |
| 6. Scaffolds | 118 |
| 6.1. Hydrogels | 118 |
| 6.2. Synthetic Polymer Scaffolds | 119 |
| 7. Future Directions and Outcomes | 120 |
| References | 120 |

CHAPTER 7. Gene Therapy for Tissue Regeneration

Stelios Andreadis

| | |
|---|-----|
| 1. Introduction to Wound Healing | 125 |
| 1.1. Skin Structure and Physiology | 125 |
| 1.2. Overview of Cellular Processes during Wound Healing | 126 |
| 2. Tissue Engineered Skin for Wound Healing | 128 |
| 3. Gene Therapeutics | 129 |
| 3.1. Viral Gene Delivery | 129 |
| 3.2. Nonviral Gene Delivery | 132 |
| 4. Gene Therapy Approaches for Tissue Regeneration | 133 |
| 4.1. Gene-Modified Skin Substitutes | 133 |
| 4.2. Direct <i>In Vivo</i> Gene Delivery | 134 |
| 4.3. Biomaterials for Controlled Gene Delivery at the Wound Site | 135 |
| 5. Gene-Modified Skin Substitutes as Biological Models of Tissue Regeneration | 136 |
| 6. Conclusion | 137 |
| References | 138 |

CHAPTER 8. Biodegradable Polymers in Neural Tissue Engineering

*Thomas Freier, Maria Jimenez Hamann, Yusuke Katayama,
Patricia Musoke-Zawedde, Alexandra Piotrowicz, Yumin Yuan,
Molly S. Shoichet, Jason Belkas, Rajiv Midha*

| | |
|--|-----|
| 1. Introduction | 142 |
| 2. Clinical Background | 142 |
| 2.1. Peripheral Nerve Injury | 142 |
| 2.2. Spinal Cord Injury | 144 |
| 3. Polymeric Tubes and Scaffolds for Nerve Guidance | 145 |
| 3.1. Biopolymers | 145 |
| 3.2. Synthetic Polymers | 156 |
| 4. Polymers for Controlled Release of Neuroactive Agents | 172 |
| 4.1. Biodegradable Microparticulate Carriers for Drug Delivery | 173 |
| 4.2. Other Drug Release Systems | 178 |
| 5. Outlook and Perspectives | 180 |
| References | 181 |

CHAPTER 9. Biodegradable Elastomeric Polymers for Tissue Engineering

Jian Yang, Antonio Webb, Guillermo A. Ameer

| | |
|--|-----|
| 1. Introduction | 192 |
| 1.1. Introduction to Tissue Engineering | 192 |
| 1.2. Mechanical Considerations for Tissue Engineering Scaffolds | 193 |
| 2. Elasticity Theory | 194 |
| 2.1. Affine Network Model | 197 |
| 2.2. Phantom Network Model | 198 |
| 2.3. Constrained Network Models | 199 |
| 2.4. Swelling of Elastomeric Polymer Networks | 200 |
| 3. Testing and Characterization of Biodegradable Elastomeric Polymers | 202 |
| 3.1. Tensile Testing | 202 |
| 3.2. Dynamic Mechanical Analysis | 202 |
| 3.3. Other Important Mechanical Properties | 206 |
| 3.4. Assessment of Biocompatibility <i>In Vitro</i> | 207 |
| 3.5. Assessment of Biocompatibility <i>In Vivo</i> | 208 |
| 3.6. Blood-Biomaterial Interactions | 209 |
| 3.7. Degradation | 210 |
| 4. Biodegradable Elastomeric Polyesters and their Derivatives | 211 |
| 4.1. Polyhydroxyalkanoates (PHAs) | 211 |
| 4.2. Poly(1,3 trimethylene carbonates) and their Copolymers with D,L-lactic Acid and ϵ -caprolactone | 216 |
| 4.3. Poly(glycolide-co- ϵ -caprolactone) (PGCL) | 220 |
| 4.4. Poly(glycerol-sebacate) | 222 |
| 4.5. Poly(diols-citrate) | 224 |
| References | 228 |

CHAPTER 10. Biodegradable Polymers in Vascular Applications

Cheryl A. Miller

| | |
|--|-----|
| 1. Introduction | 233 |
| 2. Biodegradable Polymer Vascular Implants | 234 |
| 2.1. Stents | 234 |

| | |
|---|-----|
| 3. Biodegradable Polymer Vascular Scaffolds | 234 |
| 3.1. Vascular Grafts | 234 |
| 3.2. Valves | 236 |
| 4. Biodegradable Polymer Vascular Device Coatings | 236 |
| 4.1. Synthetic Vascular Grafts | 236 |
| 4.2. Metallic Stents | 236 |
| 4.3. Metallic Coils | 237 |
| 5. Summary | 237 |
| References | 237 |

CHAPTER 11. Synthesis and Characterization of Injectable and Biodegradable Composites for Orthopedic Applications

Esmail Jabbari, Lichun Lu, Michael J. Yaszemski

| | |
|---|-----|
| 1. Introduction | 240 |
| 2. Bone Tissue Engineering | 240 |
| 2.1. Clinical Needs for Bone Graft Substitutes | 240 |
| 2.2. Materials Requirements | 241 |
| 2.3. Ceramic Bioactive Cements | 242 |
| 2.4. Multiphasic Ceramic/Polymer Composites | 243 |
| 2.5. Polymers | 244 |
| 3. Cartilage Tissue Engineering | 249 |
| 3.1. Clinical Needs | 249 |
| 3.2. Natural Polymers | 250 |
| 3.3. Synthetic Polymers | 253 |
| 3.4. Synthetic Gels | 253 |
| 4. Characterization | 258 |
| 4.1. Scaffold Interconnectivity | 258 |
| 4.2. Gelation Characteristics and Time-Dependence of Cell Viability | 259 |
| 5. Summary | 260 |
| References | 261 |

CHAPTER 12. Bioabsorbable Plate and Screw Fixation in Craniomaxillofacial Surgery

Barry L. Eppley, William S. Pietrzak

| | |
|---|-----|
| 1. Introduction | 271 |
| 2. Polymer Science—Basics for the Practicing Surgeon | 272 |
| 2.1. Base Polymer Compositions for Bioabsorbable Fixation Devices | 272 |
| 2.2. Polymer Structure, Molecular Weight, and Strength | 273 |
| 2.3. Polymer Characteristics Based on Temperature | 274 |
| 2.4. Degradation of Polymer Devices | 275 |
| 3. History of Bioabsorbable Polymer Technology Development | 276 |
| 4. Current Issues | 301 |
| 4.1. Biocompatibility | 301 |
| 4.2. FDA Regulation | 301 |
| 4.3. Clinical Application | 302 |
| 5. Summary | 303 |
| References | 303 |
| Index | 307 |
