<i>Preface to the Sixth Edition</i>	xvii
<i>Preface to the First Edition</i>	xix
<i>Acknowledgements for the Sixth Edition</i>	xxi
<i>Abbreviations for Plastics and Rubbers</i>	xxiii
1 The Historical Development of Plastics Materials	1
1.1 Natural Plastics	1
1.2 Parkesine and Celluloid	3
1.3 1900–1930	4
1.4 The Evolution of the Vinyl Plastics	6
1.5 Developments since 1939	7
1.6 Raw Materials for Plastics	9
1.7 The Market for Plastics	10
1.8 The Future for Plastics	14
2 The Chemical Nature of Plastics	19
2.1 Introduction	19
2.2 Thermoplastic and Thermosetting Behaviour	23
2.3 Further Consideration of Addition Polymerisation	24
2.3.1 Elementary kinetics of free-radical addition polymerisation	29
2.3.2 Ionic polymerisation	33
2.4 Condensation Polymerisation	37
3 States of Aggregation in Polymers	40
3.1 Introduction	40
3.2 Linear Amorphous Polymers	40
3.2.1 Orientation in linear amorphous polymers	44
3.3 Crystalline Polymers	46
3.3.1 Orientation and crystallisation	49
3.3.2 Liquid crystal polymers	50
3.4 Cross-linked Structures	50
3.5 Polyblends	52
3.6 Summary	54

vi Contents

4	Relation of Structure to Thermal and Mechanical Properties	56
4.1	Introduction	56
4.2	Factors Affecting the Glass Transition Temperature	56
4.3	Factors Affecting the Ability to Crystallise	61
4.4	Factors Affecting the Crystalline Melting Point	67
4.5	Some Individual Properties	69
4.5.1	Melt viscosity	69
4.5.2	Yield strength and modulus	69
4.5.3	Density	70
4.5.4	Impact strength	70
5	Relation of Structure to Chemical Properties	72
5.1	Introduction	72
5.2	Chemical Bonds	72
5.3	Polymer Solubility	76
5.3.1	Plasticisers	83
5.3.2	Extenders	85
5.3.3	Determination of solubility parameter	85
5.3.4	Thermodynamics and solubility	89
5.4	Chemical Reactivity	91
5.5	Effects of Thermal, Photochemical and High-energy Radiation	92
5.6	Aging and Weathering	95
5.7	Diffusion and Permeability	96
5.8	Toxicity	99
5.9	Fire and Plastics	100
6	Relation of Structure to Electrical and Optical Properties	106
6.1	Introduction	106
6.2	Dielectric Constant, Power Factor and Structure	106
6.3	Some Quantitative Relationships of Dielectrics	113
6.4	Electronic Applications of Polymers	115
6.5	Electrically Conductive Polymers	116
6.6	Optical Properties	116
	Appendix — Electrical Testing	118
7	Additives for Plastics	120
7.1	Introduction	120
7.2	Fillers	122
7.2.1	Coupling agent	124
7.3	Plasticisers and Softeners	127
7.4	Lubricants and Flow Promoters	128
7.5	Anti-aging Additives	130
7.5.1	Antioxidants	130
7.5.2	Antiozonants	139
7.5.3	Stabilisers against dehydrochlorination	139
7.5.4	Ultraviolet absorbers and related materials	139
7.6	Flame Retarders	141
7.7	Colorants	145
7.8	Blowing Agents	146
7.9	Cross-linking Agents	149
7.10	Photodegradants	150
7.11	2-Oxazolines	151

✓ 8	Principles of the Processing of Plastics	154
8.1	Introduction	154
8.2	Melt Processing of Thermoplastics	155
8.2.1	Hygroscopic behaviour	155
8.2.2	Granule characteristics	155
8.2.3	Thermal properties influencing polymer melting	157
8.2.4	Thermal stability	159
8.2.5	Flow properties	159
8.2.5.1	Terminology	160
8.2.5.2	Effect of environmental and molecular factors on viscous flow properties	163
8.2.5.3	Flow in an injection mould	166
8.2.5.4	Elastic effects in polymer melts	167
8.2.6	Thermal properties affecting cooling	170
8.2.7	Crystallisation	171
8.2.8	Orientation and shrinkage	171
8.3	Melt Processing of Thermosetting Plastics	172
8.4	Processing in the Rubbery State	175
8.5	Solution, Suspension and Casting Processes	177
8.6	Summary	178
✓ 9	Principles of Product Design	180
9.1	Introduction	180
9.2	Rigidity of Plastics Materials	180
9.2.1	The assessment of maximum service temperature	182
9.2.1.1	Assessment of thermal stability	182
9.2.1.2	Assessment of softening point	184
9.3	Toughness	186
9.3.1	The assessment of impact strength	188
9.4	Stress–Strain–Time Behaviour	191
9.4.1	The WLF equations	192
9.4.2	Creep curves	194
9.4.3	Practical assessment of long-term behaviour	196
9.5	Recovery from Deformation	197
9.6	Distortion, Voids and Frozen-in Stress	198
9.7	Conclusions	200
10	Polyethylene	201
10.1	Introduction	201
10.2	Preparation of Monomer	203
10.3	Polymerisation	203
10.3.1	High-pressure polymerisation	204
10.3.2	Ziegler processes	205
10.3.3	The Phillips process	206
10.3.4	Standard Oil Company (Indiana) process	206
10.3.5	Processes for making linear low-density polyethylene	207
10.4	Structure and Properties of Polyethylene	207
10.5	Properties of Polyethylene	212
10.5.1	Mechanical properties	212
10.5.2	Thermal properties	216
10.5.3	Chemical properties	218
10.5.4	Electrical properties	221
10.5.5	Properties of LLDPE and VLDPE	222

viii **Contents**

10.6	Additives	222
10.7	Processing	226
10.8	Polyethylenes of Low and High Molecular Weight	232
10.9	Cross-linked Polyethylene	232
10.10	Chlorinated Polyethylene	234
10.11	Applications	234
11	Aliphatic Polyolefins other than Polyethylene, and Diene Rubbers	240
11.1	Polypropylene	240
11.1.1	Preparation of polypropylene	241
11.1.2	Structure and properties of polypropylene	242
11.1.3	Properties of isotactic polypropylene	245
11.1.4	Additives for isotactic polypropylene	251
11.1.5	Processing characteristics	253
11.1.6	Applications	256
11.1.7	Atactic and s'yndiotactic polypropylene	258
11.1.8	Chlorinated polypropylene	259
11.2	Polybut-1-ene	259
11.2.1	Atactic polybut-1-ene	260
11.3	Polyisobutylene	260
11.4	Poly-(4-methylpent-1-ene)	261
11.4.1	Structure and properties	261
11.4.2	General properties	263
11.4.3	Processing	263
11.4.4	Applications	264
11.5	Other Aliphatic Olefin Homopolymers	264
11.6	Copolymers Containing Ethylene	266
11.7	Diene Rubbers	269
11.7.1	Natural rubber	273
11.7.2	Synthetic polyisoprene (IR)	278
11.7.3	Polybutadiene	279
11.7.4	Styrene–butadiene rubber(SBR)	280
11.7.4.1	'High styrene resins'	282
11.7.5	Nitrile rubber (NBR)	282
11.7.6	Chloroprene rubbers (CR)	283
11.7.7	Butadiene–pentadiene rubbers	285
11.8	Thermoplastic Diene Rubbers	285
11.9	Aliphatic Olefin Rubbers	287
11.9.1	Thermoplastic polyolefin rubbers	291
11.10	Rubbery Cyclo-olefin (Cyclo-alkene) Polymers	293
11.10.1	Aliphatic polyalkenamers	293
11.10.2	Polynorbomene	294
11.10.3	Chlorine-containing copolymers	295
11.11	1,2-Polybutadiene	296
12	Vinyl Chloride Polymers	298
12.1	Introduction	298
12.2	Preparation of Vinyl Chloride	300
12.3	Polymerisation	302
12.4	Structure of Poly(vinyl chloride)	304
12.4.1	Characterisation of commercial polymers	307

12.5	Compounding Ingredients	312
	12.5.1 Stabilisers	312
	12.5.2 Plasticisers	317
	12.5.3 Extenders	323
	12.5.4 Lubricants	323
	12.5.5 Fillers	324
	12.5.6 Pigments	325
	12.5.7 Polymeric impact modifiers and processing aids	325
	12.5.8 Miscellaneous additives	329
	12.5.9 Formulations	329
12.6	Properties of PVC Compounds	332
12.7	Processing	333
	12.7.1 Plasticised PVC	334
	12.7.2 Unplasticised PVC	336
	12.7.3 Pastes	337
	12.7.4 Copolymers	341
	12.7.5 Latices	342
12.8	Applications	342
12.9	Miscellaneous Products	345
	12.9.1 Crystalline PVC	345
	12.9.2 Chlorinated PVC	346
	12.9.3 Graft polymers based on PVC	346
	12.9.4 Vinyl chloride–propylene copolymers	347
	12.9.5 Vinyl chloride–N-cyclohexylmaleimide copolymers	347
13	Fluorine-containing Polymers	349
13.1	Introduction	349
13.2	Polytetrafluoroethylene	350
	13.2.1 Preparation of monomer	350
	13.2.2 Polymerisation	350
	13.2.3 Structure and properties	351
	13.2.4 General properties	353
	13.2.5 Processing	355
	13.2.6 Additives	357
	13.2.7 Applications	358
13.3	Tetrafluoroethylene–Hexafluoropropylene Copolymers	359
13.4	Tetrafluoroethylene–Ethylene Copolymers (ETFE)	360
13.5	Polychlorotrifluoroethylene Polymers (PCTFE) and Copolymers with Ethylene (ECTFE)	360
13.6	Poly(vinyl fluoride) (PVF)	361
13.7	Poly(vinylidene fluoride)	362
13.8	Other Plastics Materials Containing Tetrafluoroethylene	363
13.9	Hexafluoroisobutylene–Vinylidene Fluoride Copolymers	365
13.10	Fluorine-containing Rubbers	365
13.11	Miscellaneous Fluoropolymers	369
14	Poly(vinyl acetate) and its Derivatives	371
14.1	Introduction	371
14.2	Poly(vinyl acetate)	371
	14.2.1 Preparation of the monomer	371
	14.2.2 Polymerisation	373
	14.2.3 Properties and uses	374
14.3	Poly(vinyl alcohol)	374
	14.3.1 Structure and properties	375
	14.3.2 Applications	376

x Contents

14.4	The Poly(vinyl acetals)	376
	14.4.1 Poly(vinyl formal)	377
	14.4.2 Poly(vinyl acetal)	378
	14.4.3 Poly(vinyl butyral)	378
14.5	Ethylene–Vinyl Alcohol Copolymers	379
14.6	Poly(vinyl cinnamate)	380
14.7	Other Organic Vinyl Ester Polymers	382
15	Acrylic Plastics	383
15.1	Introduction	383
15.2	Poly(methyl methacrylate)	385
	15.2.1 Preparation of monomer	385
	15.2.2 Polymerisation	386
	15.2.3 Structure and properties	390
	15.2.4 General properties of poly(methyl methacrylate)	390
	15.2.5 Additives	394
	15.2.6 Processing	394
	15.2.7 Applications	396
15.3	Methyl Methacrylate Polymers with Enhanced Impact Resistance and Softening Point	398
15.4	Nitrile Resins	400
15.5	Acrylate Rubbers	402
15.6	Thermosetting Acrylic Polymers	403
15.7	Acrylic Adhesives	404
15.8	Hydrophilic Polymers	405
15.9	Poly(methacrylimide)	405
15.10	Miscellaneous Methacrylate and Chloroacrylate Polymers and Copolymers	406
15.11	Other Acrylic Polymers	408
16	Plastics Based on Styrene	410
16.1	Introduction	410
16.2	Preparation of the Monomer	411
	16.2.1 Laboratory preparation	411
	16.2.2 Commercial preparation	412
16.3	Polymerisation	414
	16.3.1 Mass polymerisation	414
	16.3.2 Solution polymerisation	416
	16.3.3 Suspension polymerisation	416
	16.3.4 Emulsion polymerisation	417
	16.3.5 Grades available	417
16.4	Properties and Structure of Polystyrene	418
16.5	General Properties	419
16.6	High-impact Polystyrenes (HIPS) (Toughened Polystyrenes (TPS))	422
16.7	Styrene–Acrylonitrile Copolymers	426
16.8	ABS Plastics	426
	16.8.1 Production of ABS materials	427
	16.8.2 Processing of ABS materials	431
	16.8.3 Properties and applications of ABS plastics	432
16.9	Miscellaneous Rubber-modified Styrene–Acrylonitrile and Related Copolymers	432
16.10	Styrene–Maleic Anhydride Copolymers	434
16.11	Butadiene–Styrene Block Copolymers	435
16.12	Miscellaneous Polymers and Copolymers	436

16.13	Stereoregular Polystyrene	438
16.14	Processing of Polystyrene	438
16.15	Expanded Polystyrene	439
	16.15.1 Structural foams	442
16.16	Oriented Polystyrene	444
16.17	Applications	445
17	Miscellaneous Vinyl Thermoplastics	449
17.1	Introduction	449
17.2	Vinylidene Chloride Polymers and Copolymers	449
	17.2.1 Properties and applications of vinylidene chloride-vinyl chloride copolymers	451
	17.2.2 Vinylidene chloride-acrylonitrile copolymers	453
17.3	Coumarone-Indene resins	454
17.4	Poly(vinyl carbazole)	455
17.5	Poly(vinyl pyrrolidone)	457
17.6	Poly(vinyl ethers)	458
17.7	Other Vinyl Polymers	459
18	Polyamides and Polyimides	461
18.1	Polyamides: Introduction	461
18.2	Intermediates for Aliphatic Polyamides	463
	18.2.1 Adipic acid	463
	18.2.2 Hexamethylenediamine	464
	18.2.3 Sebacic acid and Azelaic acid	464
	18.2.4 Caprolactam	465
	18.2.5 <i>w</i> -Aminoundecanoic acid	466
	18.2.6 <i>w</i> -Aminoanthic acid	467
	18.2.7 Dodecanelactam	468
18.3	Polymerisation of Aliphatic Polyamides	469
	18.3.1 Nylons 46, 66, 69, 610 and 612	469
	18.3.2 Nylon 6	469
	18.3.3 Nylon 11	470
	18.3.4 Nylon 12	470
	18.3.5 Nylon 7	470
18.4	Structure and Properties of Aliphatic Polyamides	470
18.5	General Properties of the Nylons	473
18.6	Additives	479
18.7	Glass-filled Nylons	481
	18.7.1 Comparison of nylons 6 and 66 in glass-filled compositions	483
18.8	Processing of the Nylons	483
18.9	Applications	485
18.10	Polyamides of Enhanced Solubility	488
18.11	Other Aliphatic Polyamides	490
18.12	Aromatic Polyamides	492
	18.12.1 Glass-clear polyamides	492
	18.12.2 Crystalline aromatic polyamides	496
	18.12.2.1 Poly- <i>m</i> -xylylene adipamide	496
	18.12.2.2 Aromatic polyamide fibres	497
	18.12.2.3 Polyphthalamide plastics	499
18.13	Polyimides	499
18.14	Modified Polyimides	504
	18.14.1 Polyamide-imides	507
	18.14.2 Polyetherimides	508
18.15	Elastomeric Polyamides	509

xii Contents

19	Polyacetals and Related Materials	513
19.1	Introduction	513
19.2	Preparation of Formaldehyde	514
19.3	Acetal Resins	515
19.3.1	Polymerisation of formaldehyde	515
19.3.2	Structure and properties of acetal resins	518
19.3.3	Properties of acetal resins	520
19.3.4	Processing	524
19.3.5	Additives	525
19.3.6	Acetal–polyurethane alloys	526
19.3.7	Applications of the acetal polymers and copolymers	526
19.4	Miscellaneous Aldehyde Polymers	528
19.5	Polyethers from Glycols and Alkylene Oxides	528
19.5.1	Elastomeric polyethers	529
19.6	Oxetane Polymers	531
19.7	Polysulphides	533
20	Polycarbonates	538
20.1	Introduction	538
20.2	Production of Intermediates	539
20.3	Polymer Preparation	540
20.3.1	Ester exchange	540
20.3.2	Phosgenation process	542
20.4	Relation of Structure and Properties	543
20.4.1	Variations in commercial grades	546
20.5	General Properties	549
20.6	Processing Characteristics	555
20.7	Applications of Bis-phenol A Polycarbonates	557
20.8	Alloys based on Bis-phenol A Polycarbonates	559
20.9	Polyester Carbonates and Block Copolymers	560
20.10	Miscellaneous Carbonic Ester Polymers	561
21	Other Thermoplastics Containing p-Phenylene Groups	565
21.1	Introduction	565
21.2	Polyphenylenes	565
21.3	Poly-p-xylylene	567
21.4	Poly(phenylene oxides) and Halogenated Derivatives	567
21.5	Alkyl Substituted Poly(phenylene oxides) including PPO	567
21.5.1	Structure and properties of poly-(2,6-dimethyl- <i>p</i> -phenylene oxide) (PPO)	568
21.5.2	Processing and application of PPO	570
21.5.3	Blends based in polyphenylene oxides	570
21.5.4	Styrenic PPOs	571
21.5.5	Processing of styrenic PPOs	572
21.5.6	Polyamide PPOs	573
21.5.7	Poly(2,6-dibromo-1,4-phenylene oxide)	573
21.6	Polyphenylene Sulphides	574
21.6.1	Amorphous polyarylene sulphides	577
21.7	Polysulphones	577
21.7.1	Properties and structure of polysulphones	580
21.7.2	General properties of polysulphones	5681
21.7.3	Processing of polysulphones	582
21.7.4	Applications	582
21.7.5	Blends based on polysulphones	583
21.8	Polyarylether Ketones	583
21.9	Phenoxy Resins	587
21.10	Linear Aromatic Polyesters	588

21.11	Polyhydantoin Resins	590
21.12	Poly(parabanic acids)	591
21.13	Summary	592
22	Cellulose Plastics	594
22.1	Nature and Occurrence of Cellulose	594
22.2	Cellulose Esters	597
22.2.1	Cellulose nitrate	597
22.2.2	Cellulose acetate	602
22.2.3	Other cellulose esters	608
22.3	Cellulose Ethers	610
22.3.1	Ethyl cellulose	610
22.3.2	Miscellaneous ethers	613
22.4	Regenerated Cellulose	613
22.5	Vulcanised Fibre	615
23	Phenolic Resins	616
23.1	Introduction	616
23.2	Raw Materials	616
23.2.1	Phenol	617
23.2.2	Other phenols	619
23.2.3	Aldehydes	620
23.3	Chemical Aspects	620
23.3.1	Novolaks	620
23.3.2	Resols	622
23.3.3	Hardening	622
23.4	Resin Manufacture	624
23.5	Moulding Powders	626
23.5.1	Compounding ingredients	627
23.5.2	Compounding of phenol–formaldehyde moulding compositions	629
23.5.3	Processing characteristics	630
23.5.4	Properties of phenolic mouldings	633
23.5.5	Applications	633
23.6	Phenolic Laminates	635
23.6.1	The properties of phenolic laminates	637
23.6.2	Applications of phenolic laminates	639
23.7	Miscellaneous Applications	640
23.8	Resorcinol–Formaldehyde Adhesives	643
23.9	Friedel–Crafts and Related Polymers	643
23.10	Phenolic Resin Fibres	647
24	Aminoplastics	649
24.1	Introduction	649
24.2	Urea–Formaldehyde Resins	650
24.2.1	Raw materials	650
24.2.2	Theories of resinification	650
24.2.3	U–F moulding materials	652
24.2.4	Adhesives and related uses	658
24.2.5	Foams and firelighters	659
24.2.6	Other applications	660
24.3	Melamine–Formaldehyde Resins	661
24.3.1	Melamine	661
24.3.2	Resinification	663
24.3.3	Moulding powders	664
24.3.4	Laminates containing melamine–formaldehyde resin	668
24.3.5	Miscellaneous applications	669

24.4	Melamine–Phenolic Resins	670
24.5	Aniline–Formaldehyde Resins	670
24.6	Resins Containing Thiourea	672
25	Polyester Resins	674
25.1	Introduction	674
25.2	Unsaturated Polyester Laminating Resins	676
25.2.1	Selection of raw materials	676
25.2.2	Production of resins	681
25.2.3	Curing systems	682
25.2.4	Structure and properties	684
25.2.5	Polyester–glass fibre laminates	684
25.2.6	Water-extended polyesters	688
25.2.7	Allyl resins	688
25.3	Polyester Moulding Compositions	689
25.4	Fibre-forming and Film-forming Polyesters	693
25.5	Poly(ethylene terephthalate) Moulding Materials	700
25.6	Poly(butylene terephthalate)	703
25.7	Poly-(1,4-cyclohexylenedimethyleneterephthalate) (PCT)	706
25.7.1	Poly-(1,4-cyclohexylenedimethyleneterephthalate-co-isophthalate)	706
25.8	Highly Aromatic Linear Polyesters	707
25.8.1	Liquid crystal polyesters	711
25.9	Polyester Thermoplastic Elastomers	715
25.10	Poly(pivalolactone)	717
25.11	Polycaprolactones	718
✓ 25.12	Surface Coatings, Plasticisers and Rubbers	718
26	Epoxide Resins	722
26.1	Introduction	722
26.2	Preparation of Resins from Bis-phenol A	723
26.3	Curing of Glycidyl Ether Resins	729
26.3.1	Amine hardening systems	731
26.3.2	Acid hardening systems	736
26.3.3	Miscellaneous hardener systems	739
26.3.4	Comparison of hardening systems	739
26.4	Miscellaneous Epoxide Resins	739
26.4.1	Miscellaneous glycidyl ether resins	739
26.4.2	Non-glycidyl ether epoxides	742
26.5	Diluents, Flexibilisers and other Additives	746
26.6	Structure and Properties of Cured Resins	750
26.7	Applications	750
27	Polyurethanes and Polyisocyanurates	756
27.1	Introduction	756
27.2	Isocyanates	757
27.3	Fibres and Crystalline Moulding Compounds	760
27.4	Rubbers	762
27.4.1	Cast polyurethane rubbers	762
27.4.2	Millable gums	765
27.4.3	Properties and applications of cross-linked polyurethane rubbers	766
27.4.4	Thermoplastic polyurethane rubbers and Spandex fibres	767
27.5	Flexible Foams	769
27.5.1	One-shot polyester foams	769
27.5.2	Polyether prepolymer	771

	27.5.3	Quasi-prepolymer polyether foams	772
	27.5.4	Polyether one-shot foams	772
	27.5.5	Properties and applications of flexible foams	776
27.6		Rigid and Semi-rigid Foams	778
	27.6.1	Self-skinning foams and the RIM process	781
27.7		Coatings and Adhesives	782
27.8		Polyisocyanurates	782
27.9		Polycarbodi-imide Resins	785
27.10		Polyurethane-Acrylic Blends	785
27.11		Miscellaneous Isocyanate-Based Materials	785
28		Furan Resins	788
	28.1	Introduction	788
	28.2	Preparation of Intermediates	788
	28.3	Resinification	789
	28.4	Properties of the Cured Resins	790
	28.5	Applications	790
29		Silicones and Other Heat-resisting Polymers	792
	29.1	Introduction	792
	29.1.1	Nomenclature	793
	29.1.2	Nature of chemical bonds containing silicon	793
	29.2	Preparation of Intermediates	795
	29.2.1	The Grignard method	796
	29.2.2	The direct process	796
	29.2.3	The olefin addition method	798
	29.2.4	Sodium condensation method	798
	29.2.5	Rearrangement of organochlorosilanes	798
	29.3	General Methods of Preparation and Properties of Silicones	799
	29.4	Silicone Fluids	801
	29.4.1	Preparation	801
	29.4.2	General properties	802
	29.4.3	Applications	804
	29.5	Silicone Resins	806
	29.5.1	Preparation	806
	29.5.2	Properties	806
	29.5.3	Applications	807
	29.6	Silicone Rubbers	810
	29.6.1	Dimethylsilicone rubbers	810
	29.6.2	Modified polydimethylsiloxane rubbers	810
	29.6.3	Compounding	814
	29.6.4	Fabrication and cross-linking	815
	29.6.5	Properties and applications	816
	29.6.6	Liquid silicone rubbers	817
	29.6.7	Polysiloxane-polyetherimide copolymers	818
	29.7	Polymers for use at High Temperatures	819
	29.7.1	Fluorine-containing polymers	819
	29.7.2	Inorganic polymers	820
	29.7.3	Cross-linked organic polymers	824
	29.7.4	Linear polymers with p-phenylene groups and other ring structures	825
	29.7.5	Ladder polymers and spiro polymers	826
	29.7.6	Co-ordination polymers	828
	29.7.7	Summary	829

xvi *Contents*

30	Miscellaneous Plastics Materials	831
30.1	Introduction	831
30.2	Casein	831
30.2.1	Chemical nature	832
30.2.2	Isolation of casein from milk	833
30.2.3	Production of casein plastics	834
30.2.4	Properties of casein	836
30.2.5	Applications	837
30.3	Miscellaneous Protein Plastics	838
30.4	Derivatives of Natural Rubber	838
30.5	Gutta Percha and Related Materials	843
30.6	Shellac	845
30.6.1	Occurrence and preparation	845
30.6.2	Chemical composition	846
30.6.3	Properties	846
30.6.4	Applications	847
30.7	Amber	848
30.7.1	Composition and properties	848
30.8	Bituminous Plastics	849
31	Selected Functional Polymers	852
31.1	Introduction	852
31.2	Thermoplastic Elastomers	852
31.2.1	Applications of thermoplastic elastomers	856
31.3	Degradable Plastics	858
31.3.1	Polyhydroxybutyrate–valerate copolymers (PHBV)	859
31.4	Intrinsically Electrically Conducting Polymers (ICPs)	863
32	Material Selection	867
32.1	Introduction	867
32.2	Establishing Operational Requirements	868
32.3	Economic Factors Affecting Material Choice	868
32.4	Material Data Sources	869
32.4.1	Computer-aided selection	871
32.5	A Simple Mechanistic Non-computer Selection System	872
32.6	A Simple Pathway-based Non-computer Selection System	872
