

CONTENTS

COUPLING AGENTS AS ADHESION PROMOTERS	1
Introduction	1
Silanes	7
Chromium Complexes	12
Phosphorus-Containing Compounds	16
Miscellaneous Agents	18
Commercially Available Agents	21
Evaluation Data	23
References	26
General Bibliography of Books and Review	46
PROCESSING POWDERED POLYETHYLENE	51
Introduction	51
Resin Choice	54
Powder Coating Applications	56
Dispersion Coating Techniques	66
Rotational Molding	667
Other Powder Molding Techniques	92
References	95
PLASTICS AND OTHER POLYMERS IN BUILDIGN	97
Introduction	98
Recent Developments	108
References	111
FIRE RETARDANCE OF POLYMEMRIC MATERIALS	113
Theoretical Considerations Factors Relating to Combustion of Plastics	113
Theoretical Considerations of Thermal Degradation	125
Means of Imparting Flame Resistance to Plastics	133
Flame Retardance Conferred by a Halogen in a Reactive Intermediate	135
Fire Retardance Conferred by a Halogen in a Nonreactive Intermediate	145
Phosphorus-Halogen Synergism	148
Antimony-Halogen Synergism	149
Boron Fire Retardants	152
Methods Used for the Formulation of Fire-Retardant Plastics	155
Evaluation of the Flammability Characteristics of Polymers	160
Summary and Conclusions	182
References	182

RECENT ADVANCES IN PHOTO-CROSS-LINKABLE POLYMERS	185
Historical	185
New Synthetic Approaches	187
New Photosensitive Polymers	190
Photosensitization	195
Monoradical Processes	206
Future Trends	211
References	213
ORGANIC COLORANTS FOR POLYMERS	217
Definition of Terms	217
Polymer Influence on Color and Performance	219
Chemical Classification of Colorants	220
Classification According to Color	224
Testing of Colorants	225
Conclusion	225
Appendix I – Chemical Classification of Organic Pigments	226
Appendix II	231
General References	233
AUTHOR INDEX	237
SUBJECT INDEX	249
