

CONTENTS

Adhesion of Polymeric Filling Material and Fissure Sealants	1
Examination of Deposits on Cigarette Filters	19
Fiber-Polymer Relationships in Coated Cotton Fabrics	35
Electron Beam Polymerization of Ethylene Monomer	51
Surface Microscopy Applied to Polyethylene Film	67
Evaluation of Adhesive Failures with the Scanning Electron Microscope	87
Ultramicrotomy of Embedding Plastics	105
Microstructure of Two-Phase Polymers	127
Morphology of Block Copolymers	137
Hysteresis of Contact Angles: The Effects of Elongation and Roughness	153
Porous Silica Beads for Gel Permeation Chromatography	165
Critical Pigment Volume Concentration in Linseed Oil Films	171
Inorganic and Polyurethane Coatings on Metal Substrates	183
Antifouling Paint Film Structure, with Particular to Cross Sections	195
Vehicle Compatibility in Emulsion Coatings	209
Author Index	221
Subject Index	223
