

## CONTENTS

	Page
1. Applications of Spectral Analysis of Polymers in Cosmetics	1
2. Voltammetry in Cosmetic Analysis	47
3. Gas-Chromatographic Determination of Mercaptoacetic Acid in Hair-Waving And Depolatory Products	65
4. Characterization and Identification of Synthetic High Polymers Using Pyrolysis-Gas Chromatography	81
5. Characterization and Identification of Quaternary Ammonium Compounds Using Pyrolysis-Gas Chromatography	105
6. Trace Analysis of Volatile Compounds Using Headspace Gas Chromatography	139
7. Qualitative Analysis of Preservatives Using High-Performance Thin-Layer Chromatography	157
8. Ion-Exchange Chromatography for the Analysis of Protein Derivatives and Specific Amino Acids	223
9. Analysis of Oxidative Hair Dyes Using High-Performance Liquid Chromatography	245
Appendix : Spectral libraries	289
Index	521
