

Table of Contents

Preface	v
Chapter 1 - Changing Business and Increasing Manufacturing Challenges.....	1
Chapter 2 - The Importance and Nature of Cosmetic Emulsions	9
Chapter 3 - Defining Product Quality and Stability.....	15
Chapter 4 - Science and Engineering of Emulsification	21
Chapter 5 - Types of Manufacturing Problems and Pragmatic Solutions	39
Chapter 6 - Solving Problems and Defusing Time-Bombs	49
Chapter 7 - Pilot Batches, Scale-Up and Controlling Process Variables	57
Chapter 8 - Understanding Human Factors	65
Chapter 9 - Strategies for Production Trouble Prevention	75
Chapter 10 - Starting from the Cradle	83
Chapter 11 - Teamwork, Flexibility and Sustainability	89
Chapter 12 - Natural/Organic Cosmetics and Related Production Problems	97
Chapter 13 - The Principles of "Less is More"	105
Chapter 14 - The Basic Principles of Low-Energy Emulsification (LEE).....	115
Chapter 15 - Practical Applications of LEE: Controlling Quality, Optimizing Energy Use.....	131
Chapter 16 - Low-Surfactant Emulsification	149
Chapter 17 - Preparing for Tomorrow	167
Index	177
